COMBINING POC

Find Better Trades By Using POC As A Filter

Orderflows Inner Circle Weekly Webinar #2 – Combining POC

Last week I introduced you to the POC Trader.

This week I want to show you how to use it with other order flow tools.

One of my priorities as a trader is to keep my risk low and one of the ways to do it is to take better trades.

e, True

How to refine your entries with POC Trader?

Look for a signal that occurs within three bars of a significant POC.

What is a significant POC – A POC that occurs within the top or bottom 2 – 3 price levels.

How I use POC Trader in combination with other order flow indicators:

Delta Surge

Trapped Traders

Delta Scalper

POC signals potential turning points.

Delta Surge signals significant increases in buying or selling.

Trapped Traders signal traders stuck in a position and need to get out.

Delta Scalper indicates potential shifts in supply and demand.

Ideally it is best to have a reason to take the trade with POC as opposed to just taking a POC by itself.

Orderflows Inner Circle Weekly Webinar #2 – Combining POC

Ideally you want the POC as close to the top in a red bar or as close to the bottom of a green bar as possible.
