## 20. Volume Imbalance (3) + Market Sweep

The Sweep will cause imbalances.

When looking for sweeps want to try and keep low time frame.

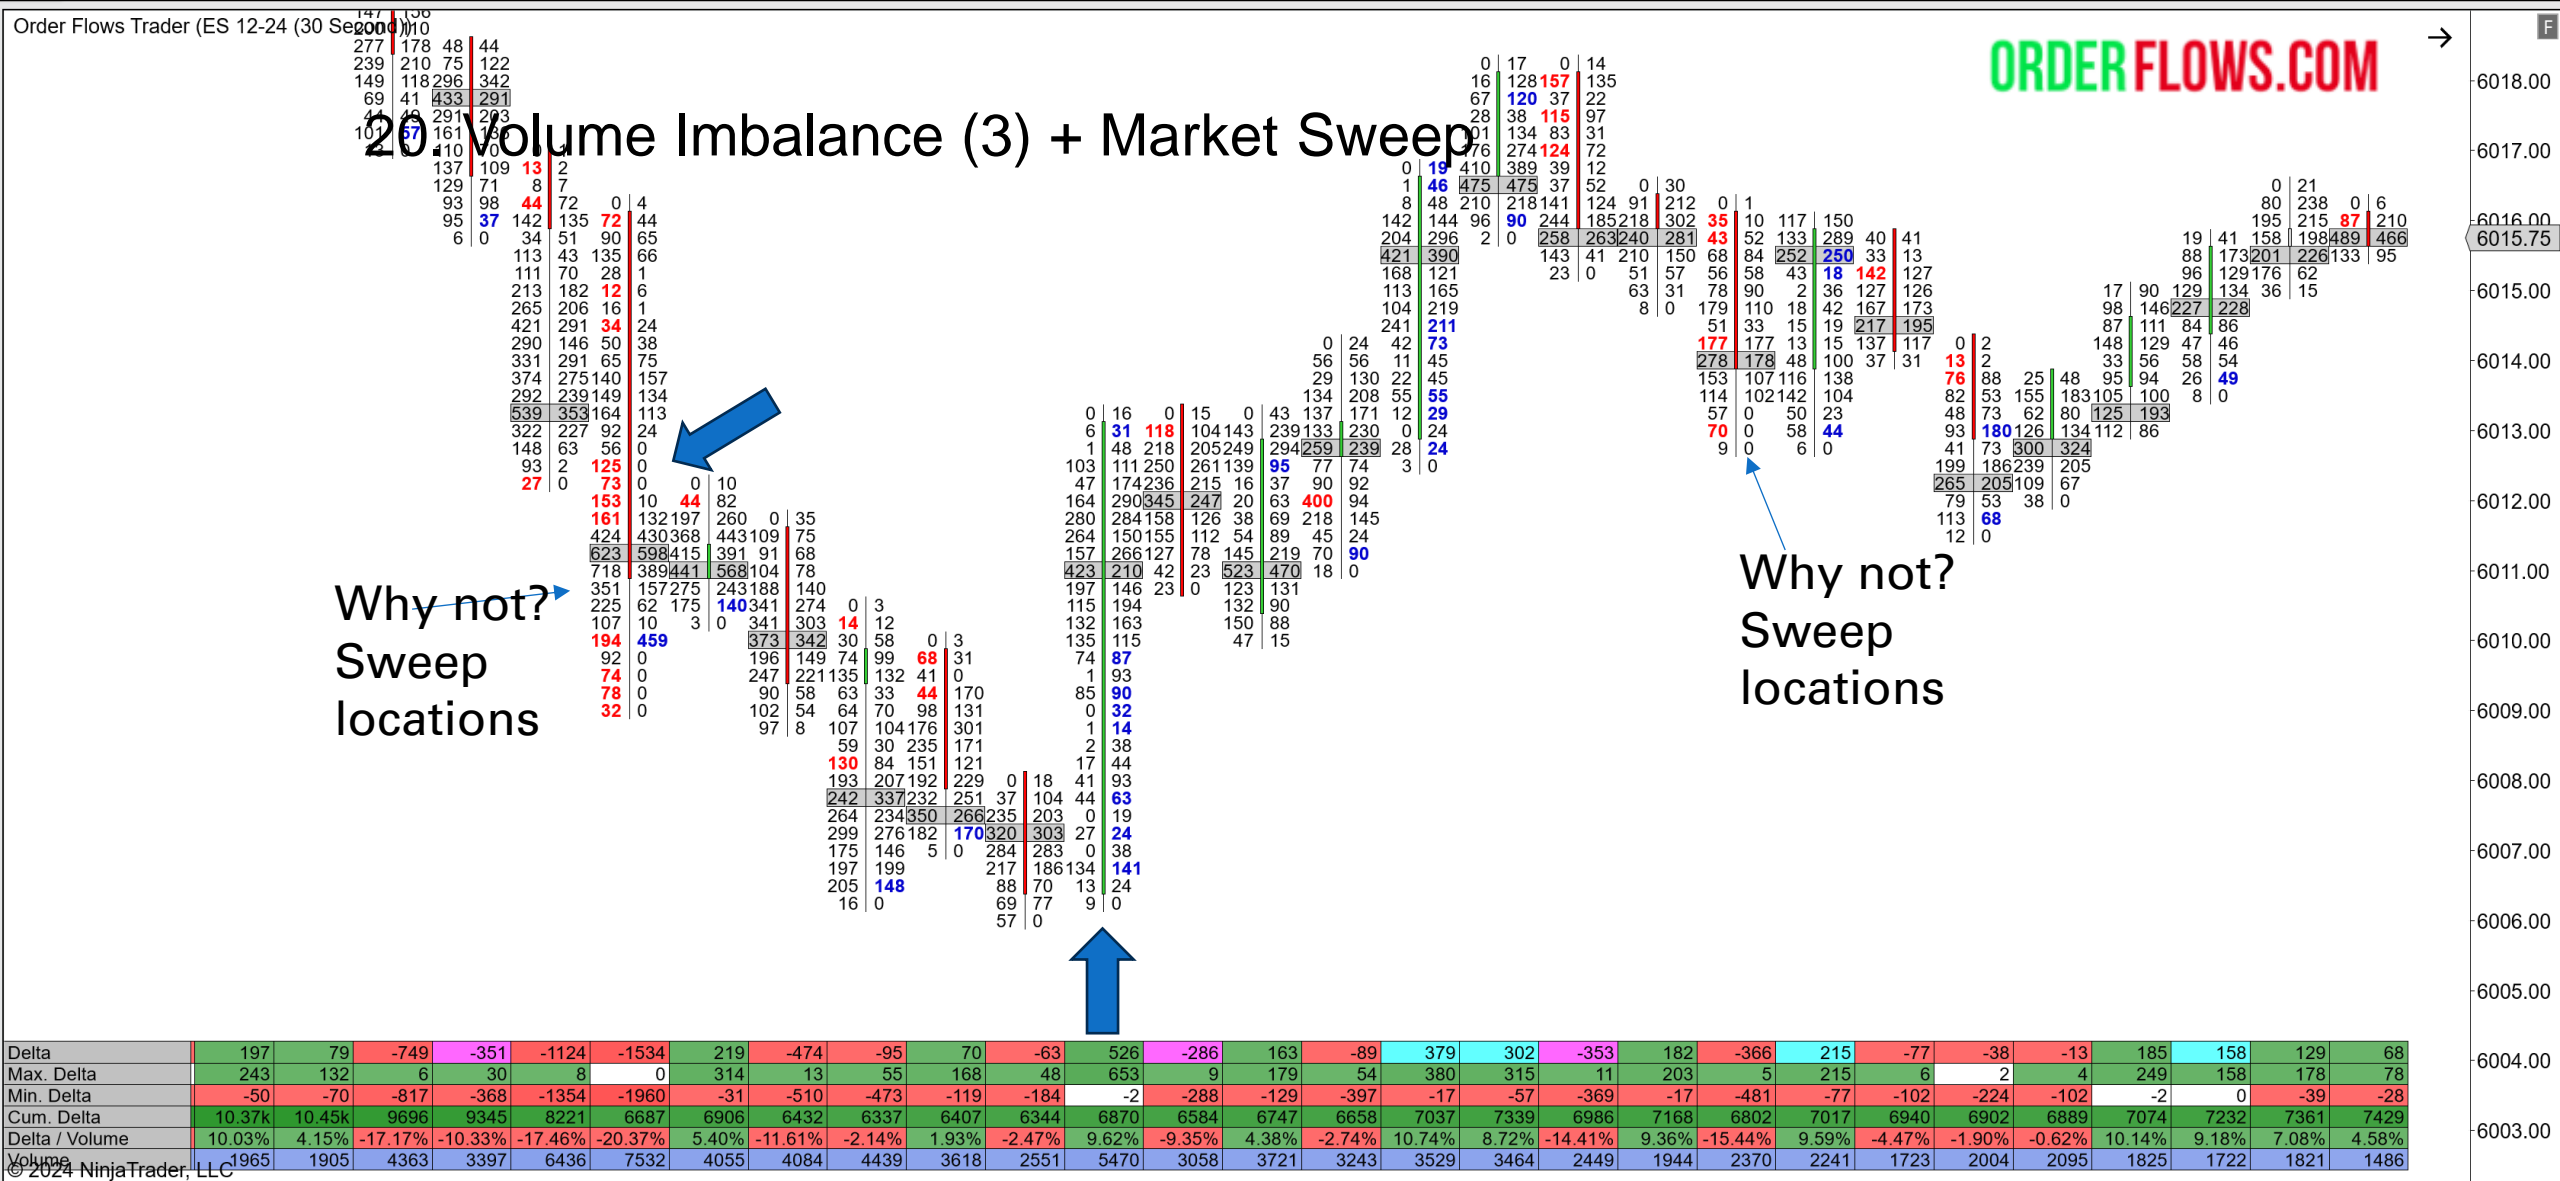

Sweep location – not edge of bar, want in the middle of the bar.

Explanation: Strong institutional flow after stop run or big order going through the market:

- Clear institutional dominance.
- Big order going through the market.
- Continuation potential.

Triggers on volume imbalance after sweep which come together.
