62. Momentum Strength + Volume Decline

Great in trends.

Explanation: Strong trend with weakening flow:

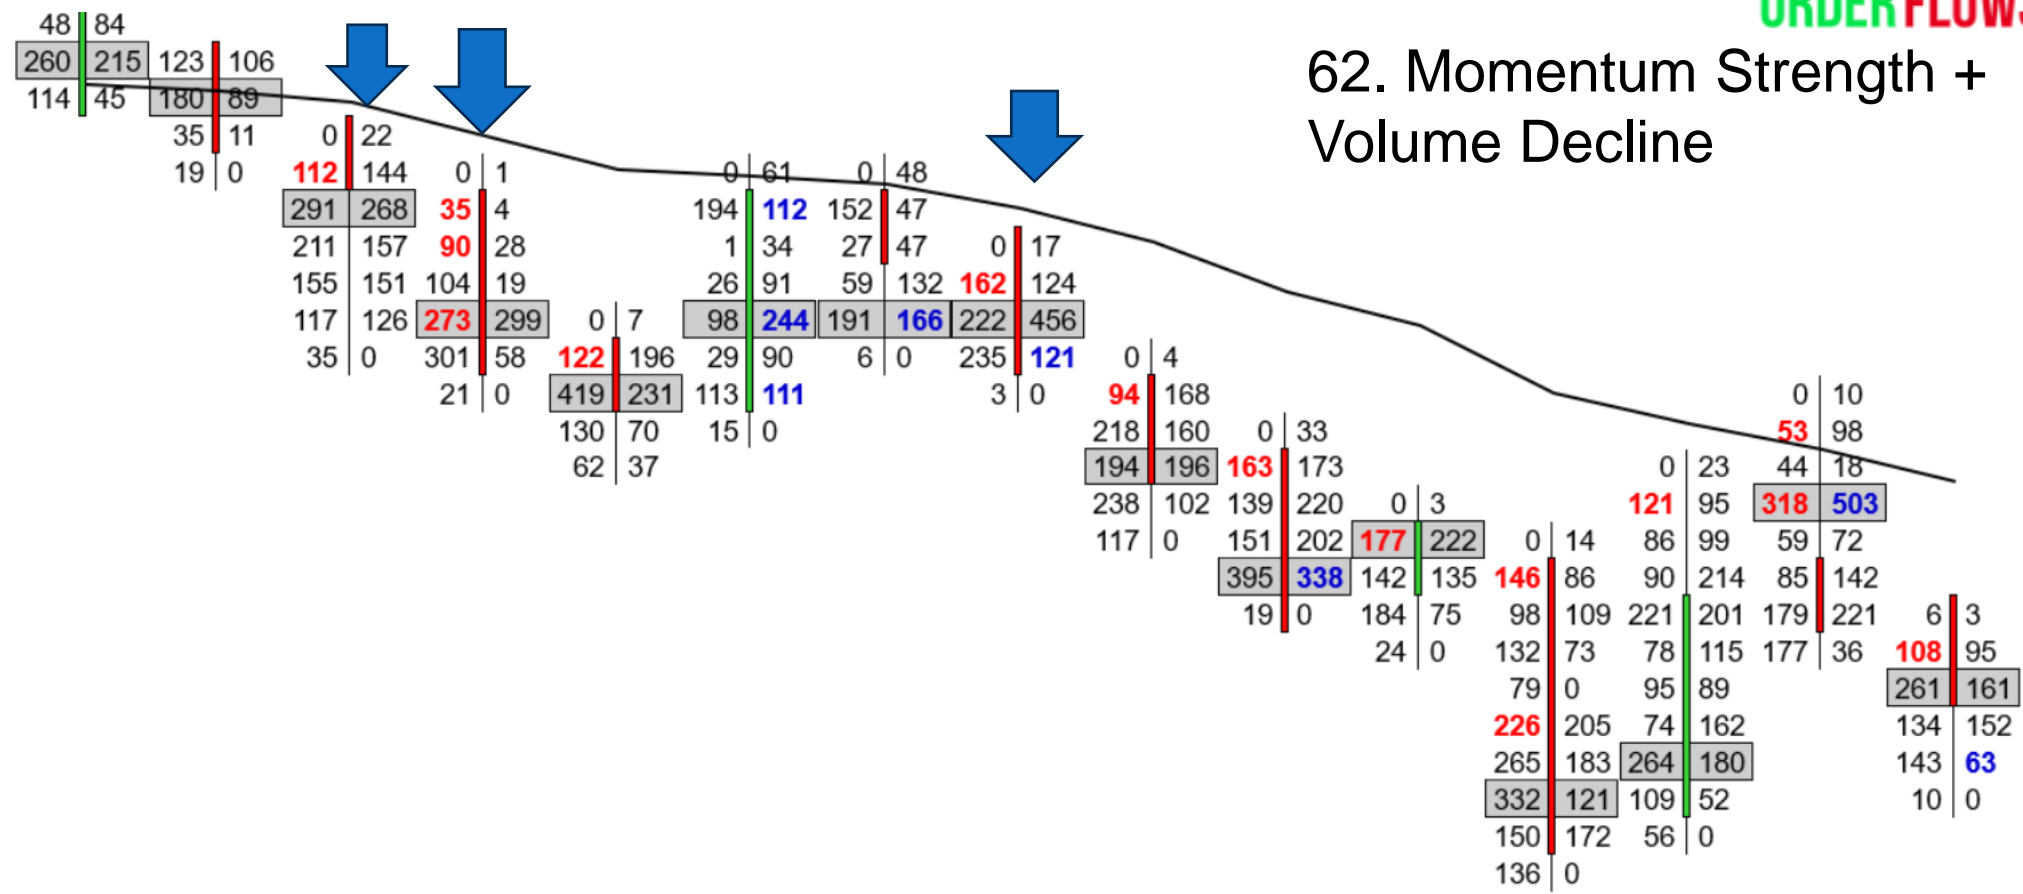

- Clear directional momentum.
- Falling participation.
- Potential reversal signal within a bar.

Triggers on momentum with declining volume.

Order Flows Trader (ES 12-24 (1 Minute)), EMA(ES 12-24 (1 Minute),14)

63. Open POC + Zero Print

Good for markets with more zero prints like currencies, not ES, MES.

Explanation: Key level with no opposition:

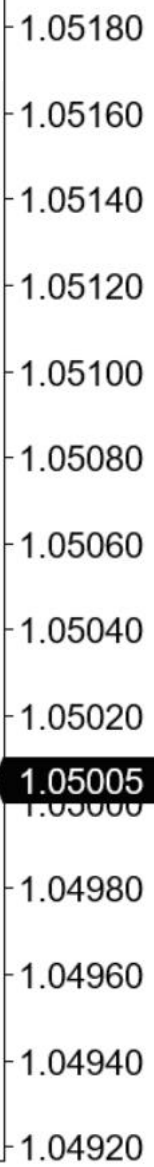

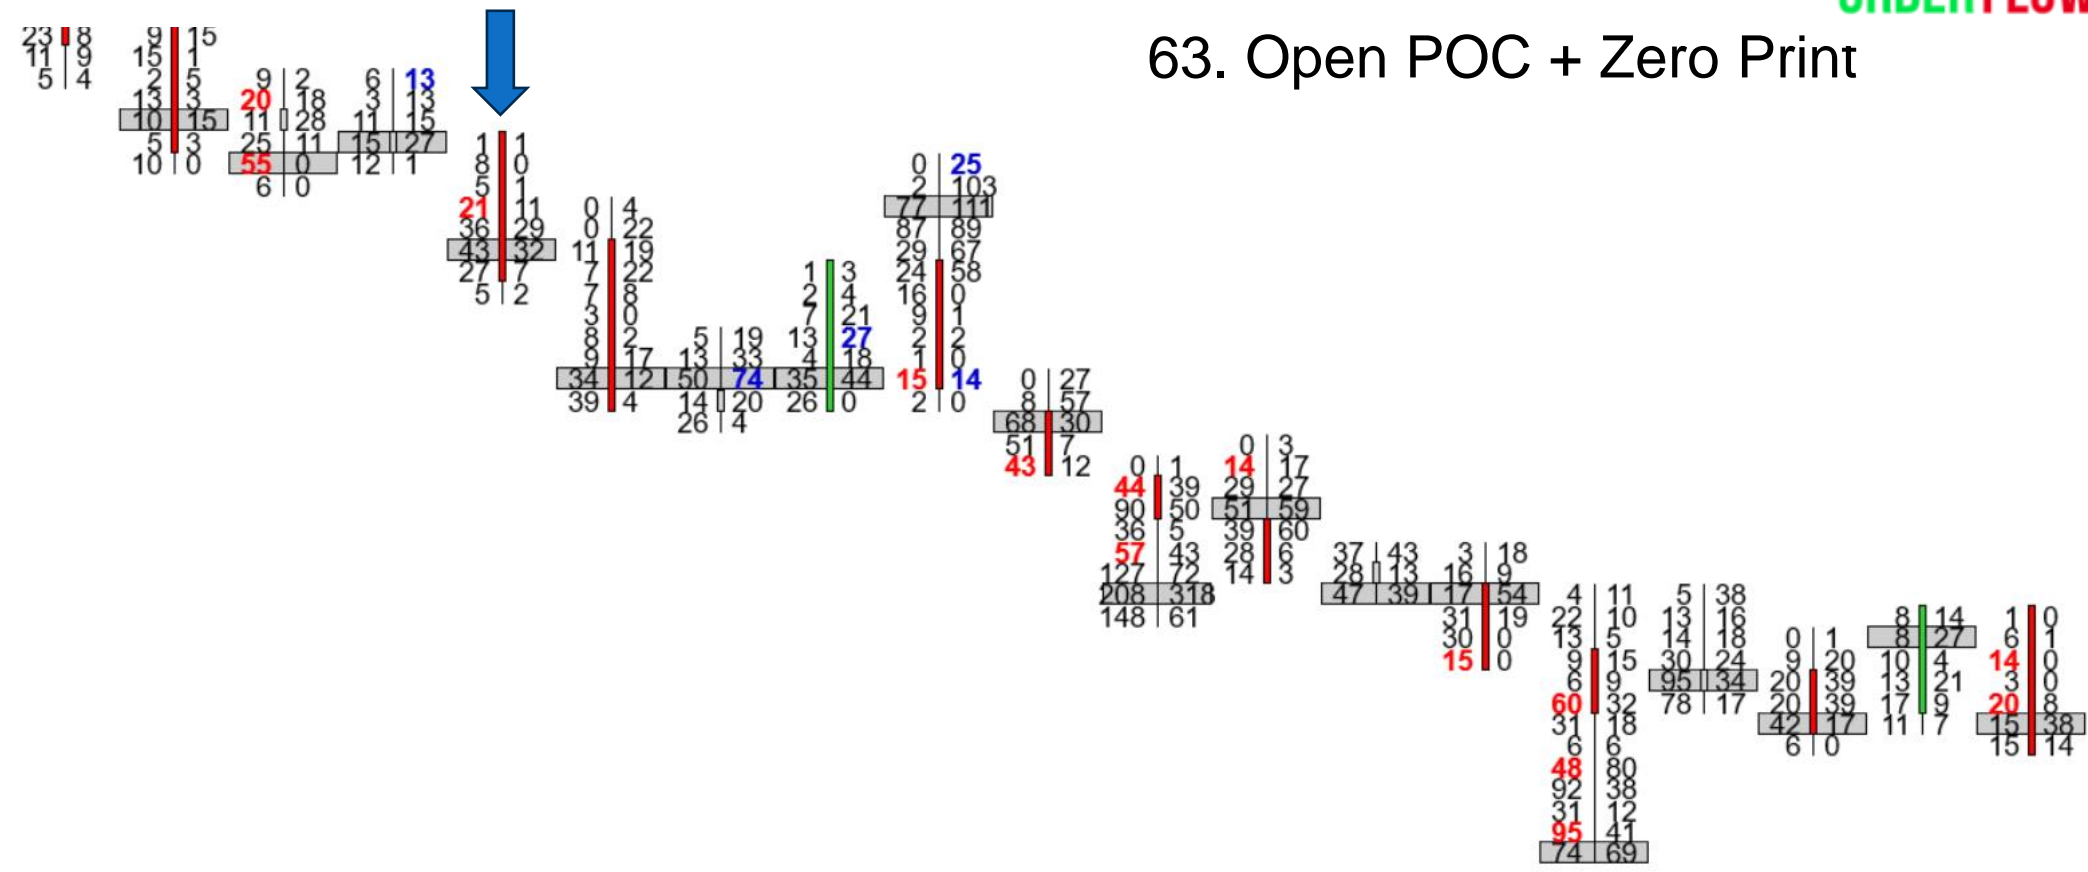

- Clear price acceptance level at new levels.
- No counter orders at edge of bar.
- Direction confirmation.

Triggers after Open POC with zero prints.

Order Flows Trader (6E 12-24 (1 Minute))

ORDERFLOWS.COM

64. Accumulation/Distribution + Thin Prints (1 and stacked 2)

Be careful in normally thin markets.

Explanation: Institutional positioning with poor acceptance:

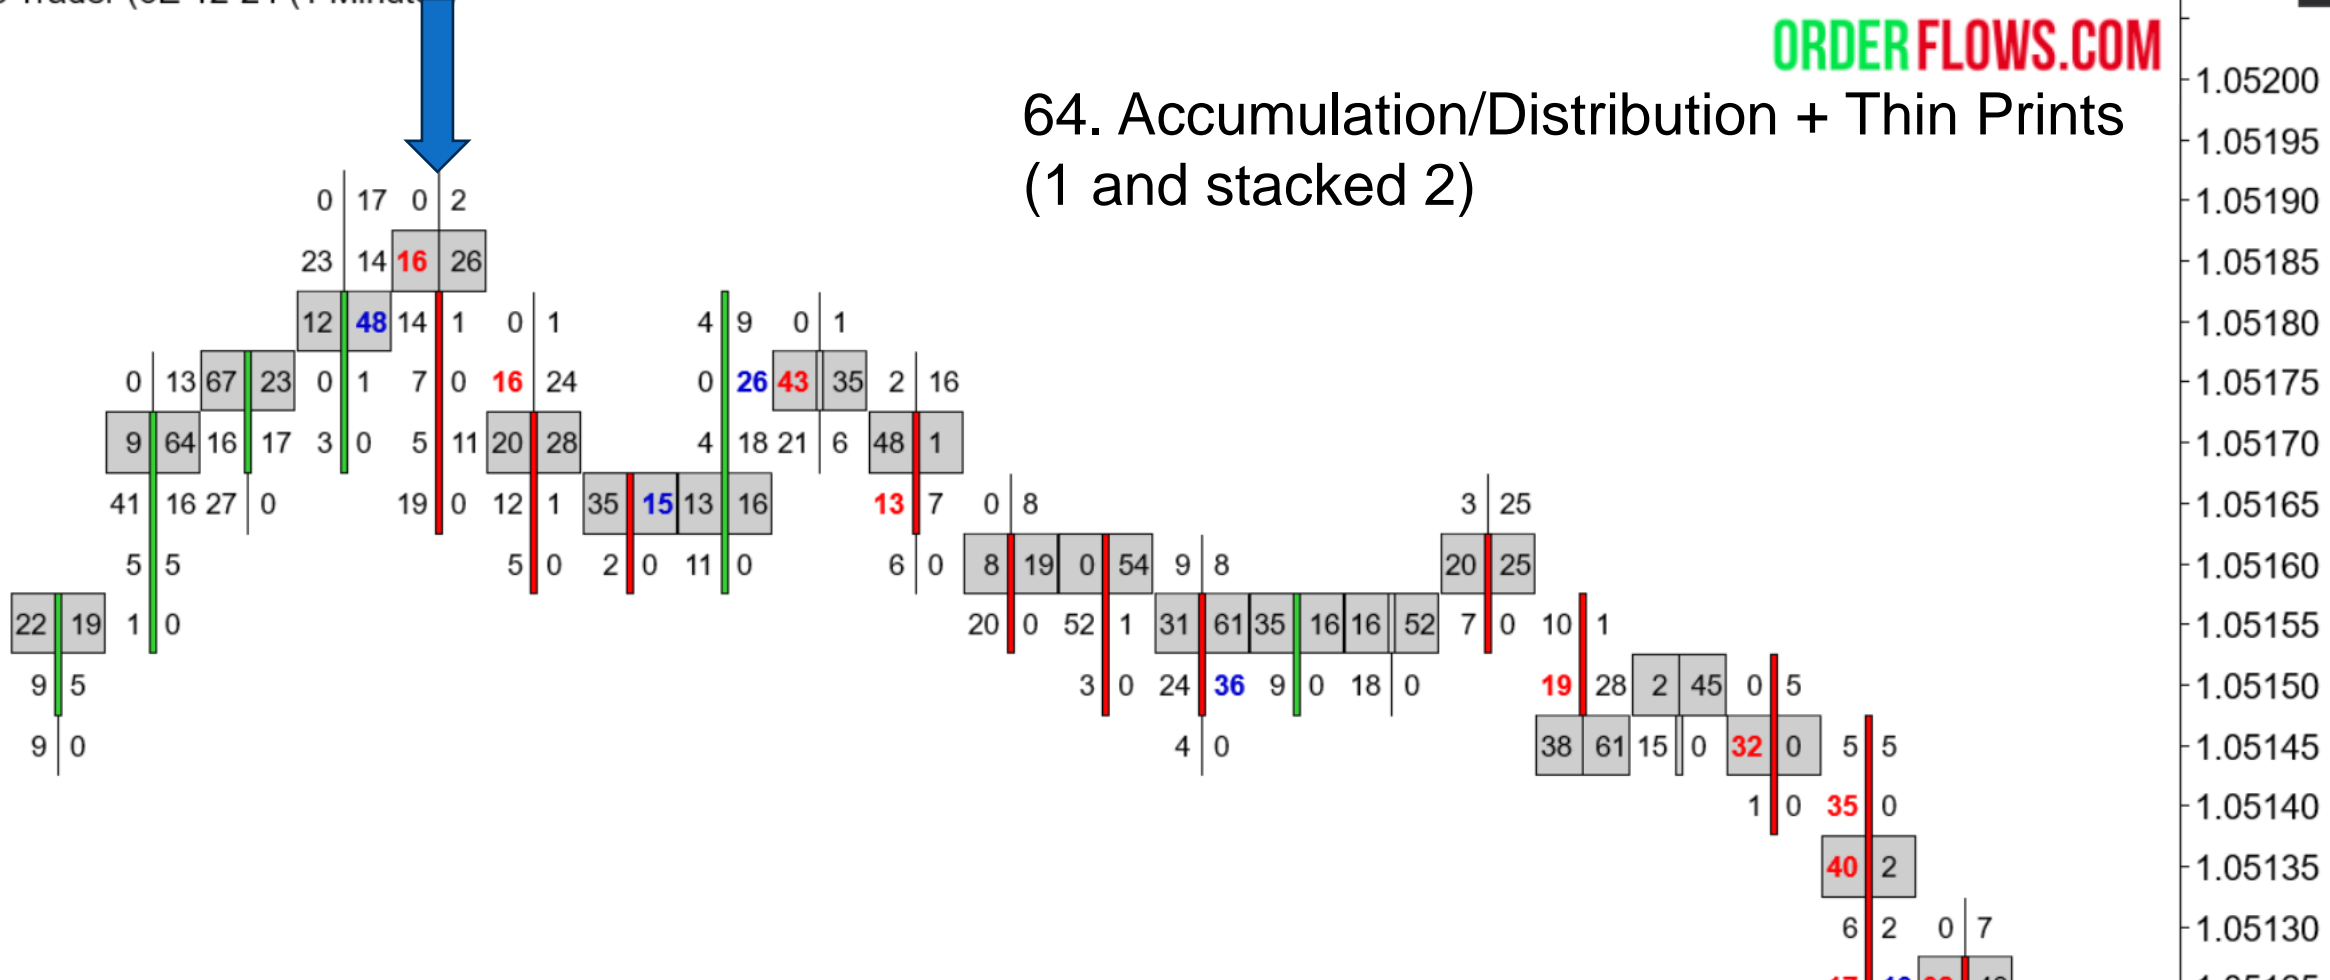

- Position building/distributing.
- Weak opposing interest.
- Institutional trading then aggressive trading.

Triggers when accumulation/distribution shows around thin prints.

Order Flows Trader (6E 12-24 (1 Minute))

78. Stacked Imbalance + Volume Decline

Explanation: Multiple aggressive levels after weakening flow:

- Consistent aggressive order flow pressure.
- Falling market participation.
- Potential exhaustion then reversal.

Triggers on stacked imbalances with declining volume.

83. Imbalance Reversal + Zero Print

Not for ES or very liquid markets, good in currencies where zero prints flourish.

Explanation: Order flow shift with no opposition:

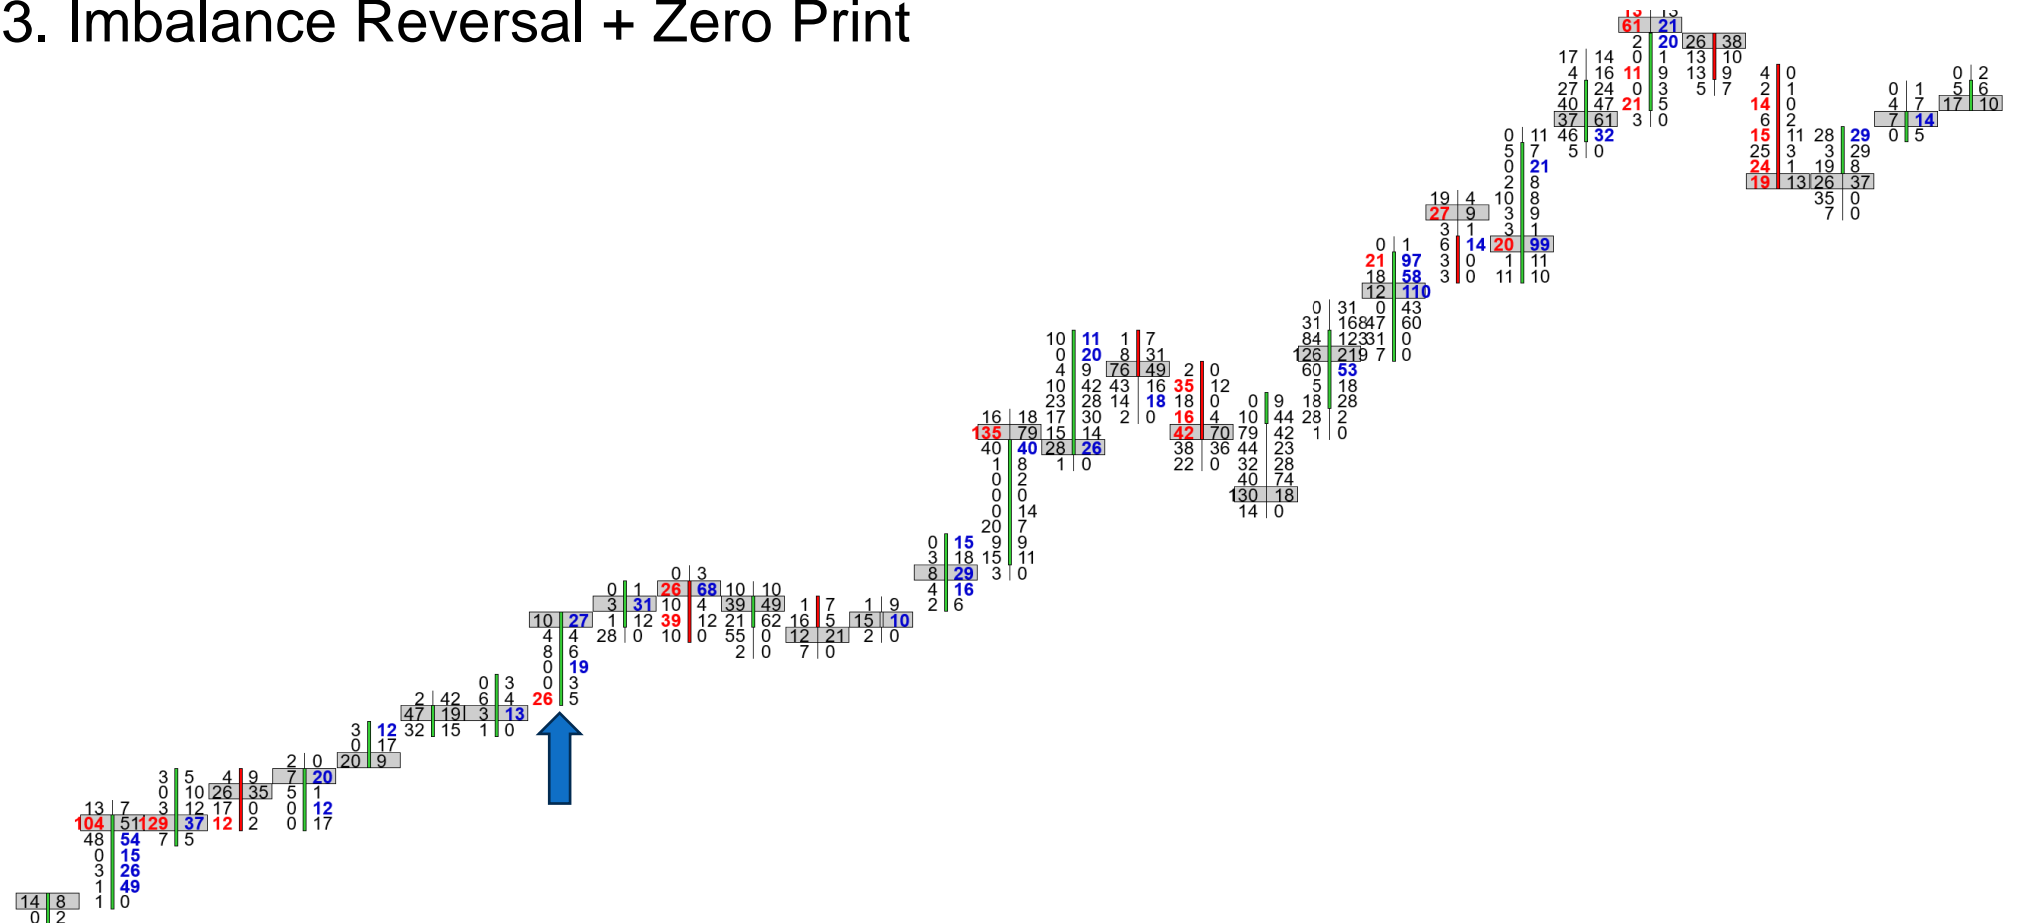

- Flow direction change.
- No counter orders.
- Strong reversal signal in a bar.

Triggers when imbalance reverses with zero prints.

Order Flows Trader (6E 12-24 (1 Minute))

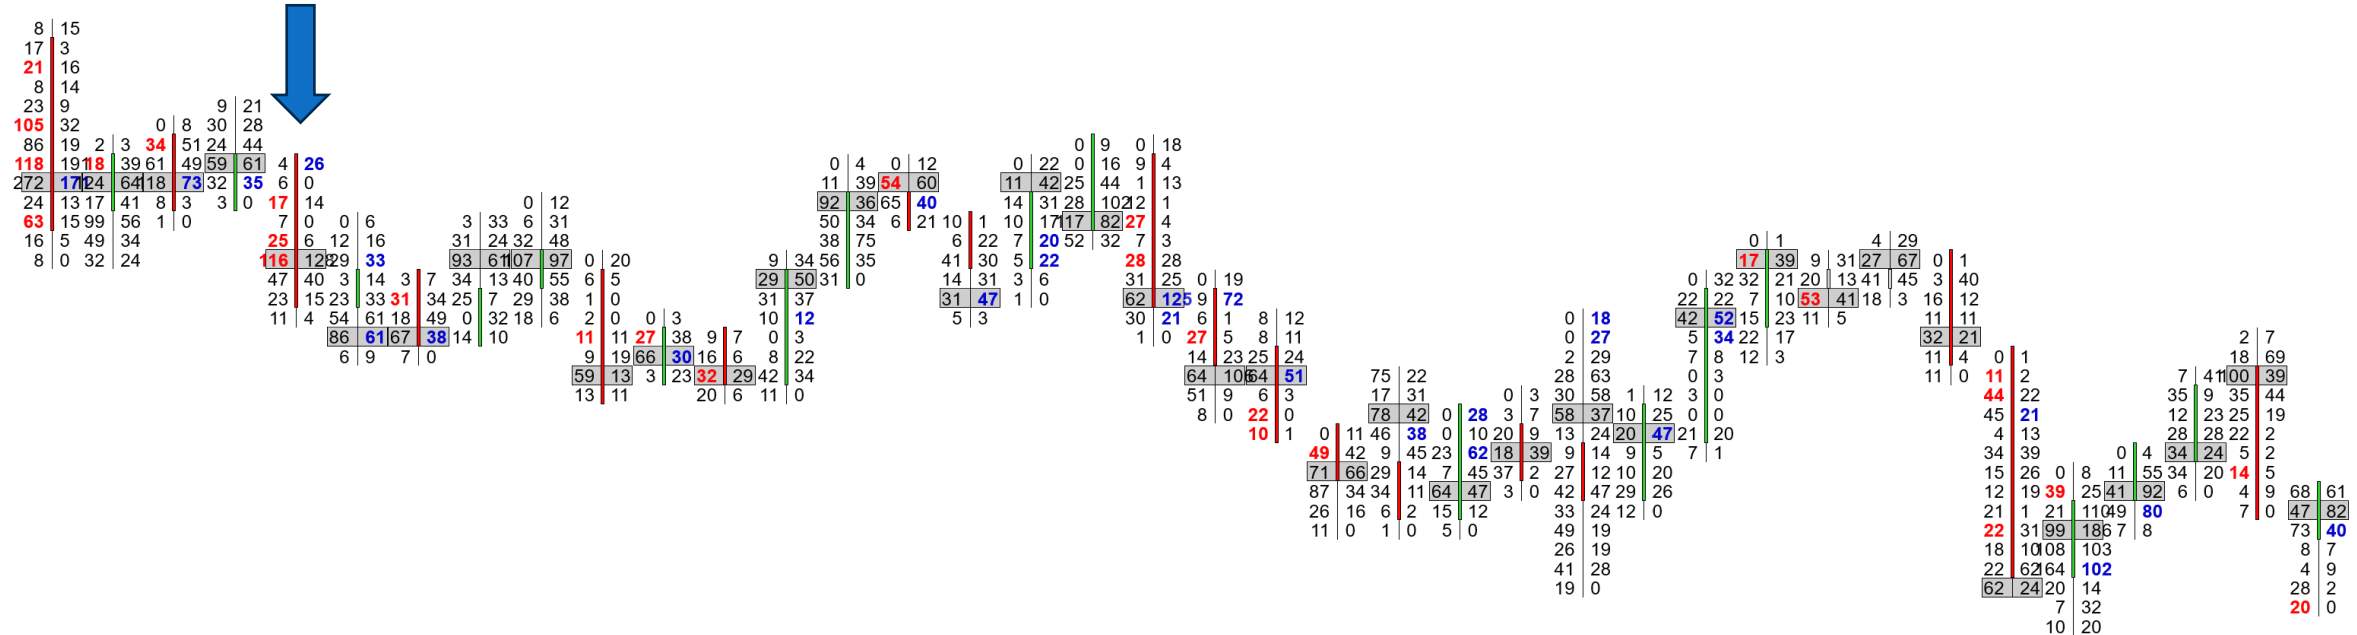

83. Imbalance Reversal + Zero Print

85. Aligned POC + Thin Prints

Especially good when the market is moving quickly

Explanation: Strong price level with poor acceptance:

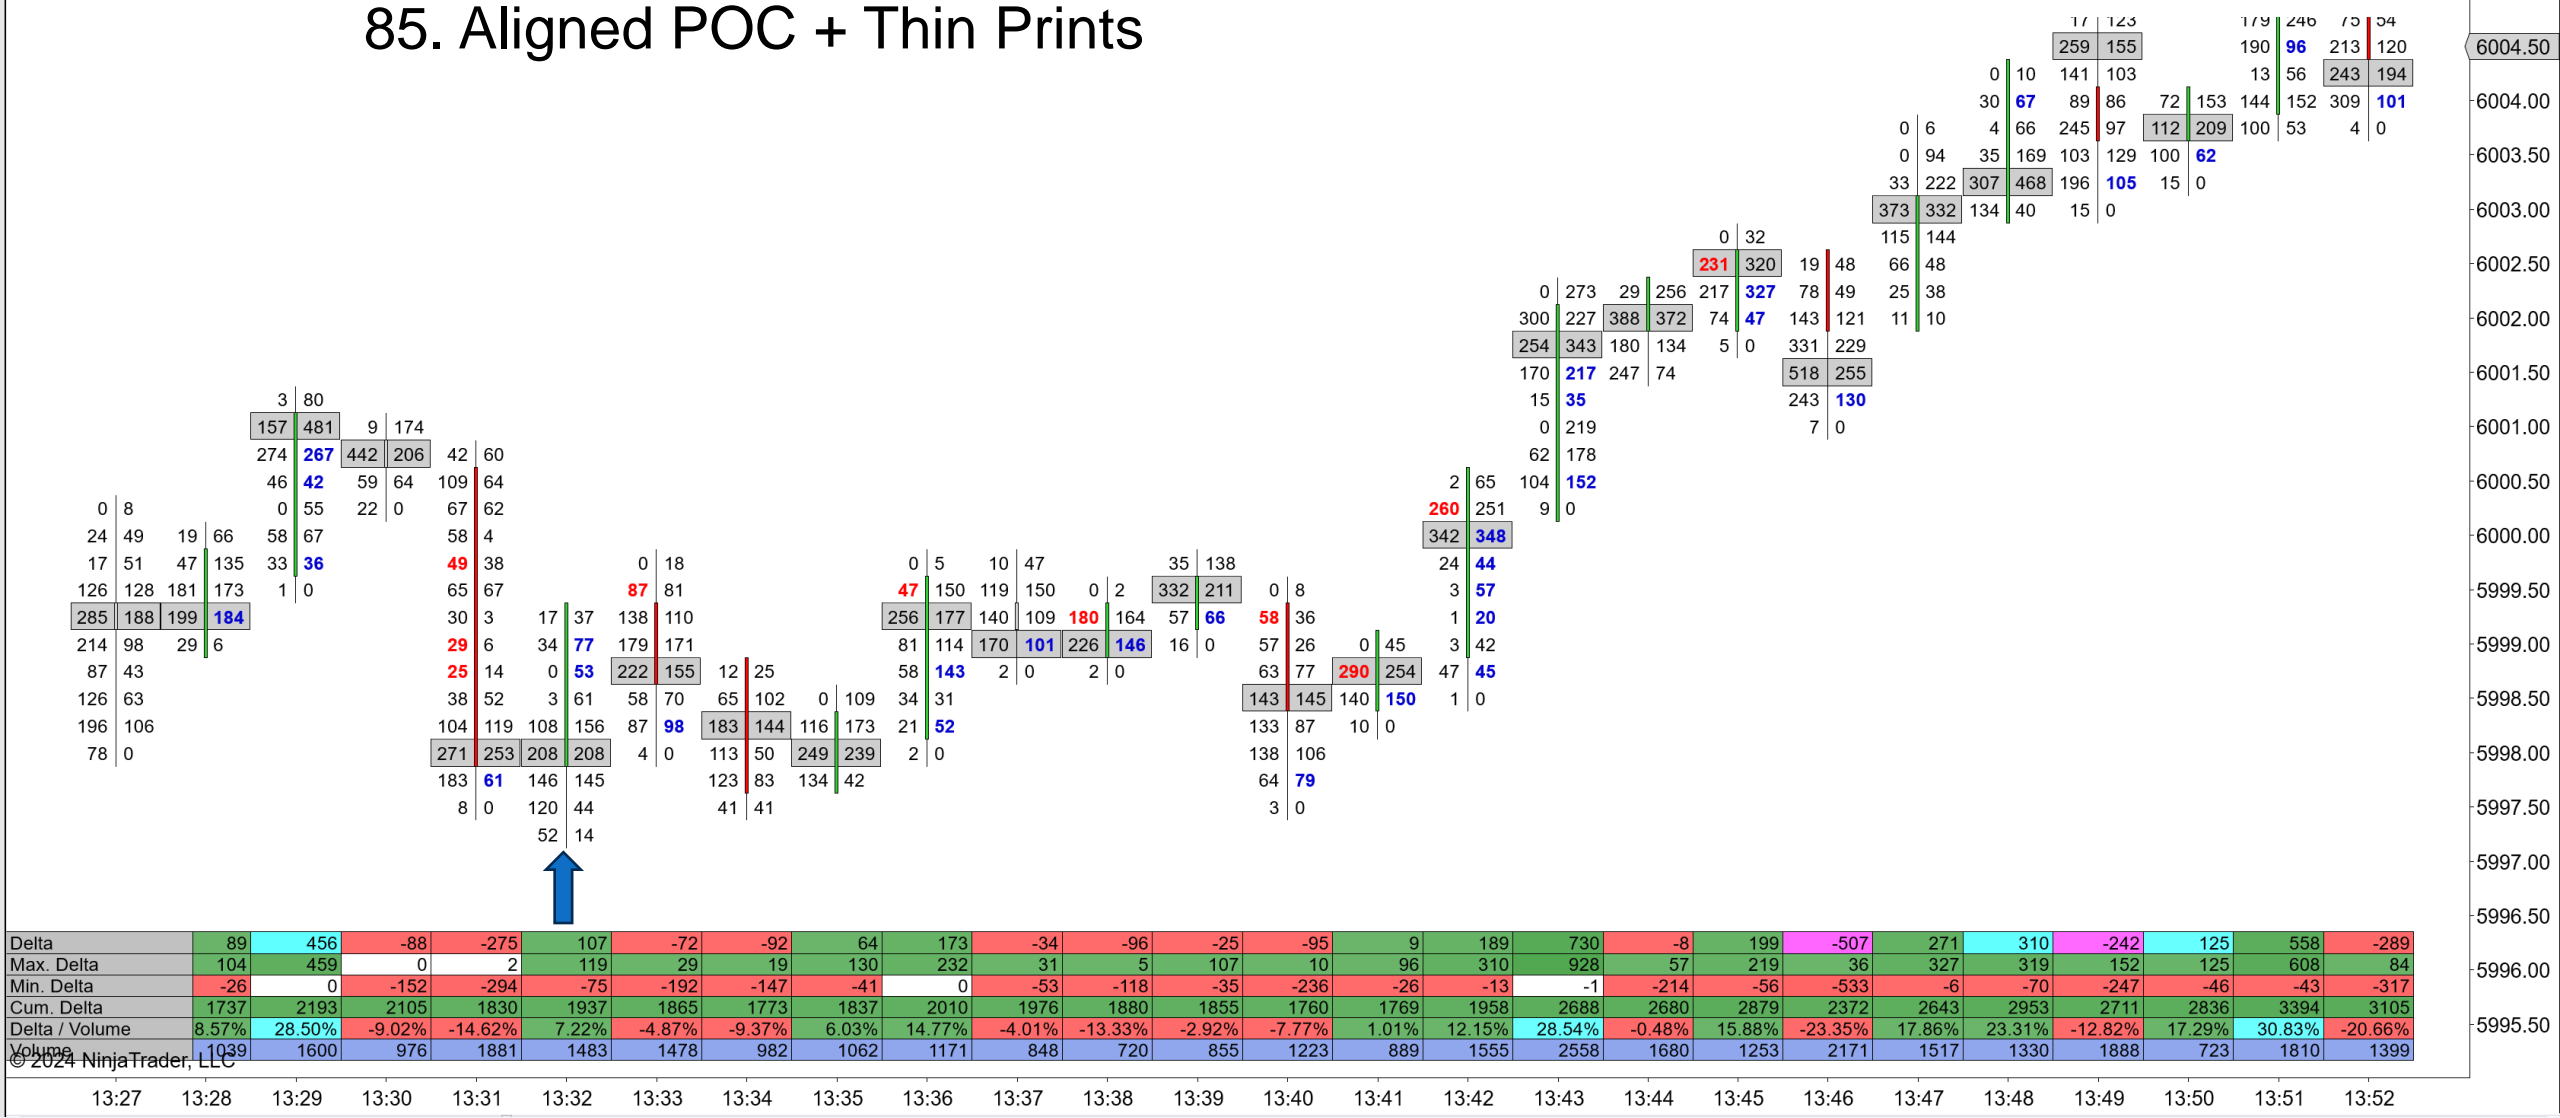

- Strong support/resistance being formed.
- Weak opposing interest as market moves.
- Market moving away quickly from volume level.

Triggers when POCs align then thin prints appear.

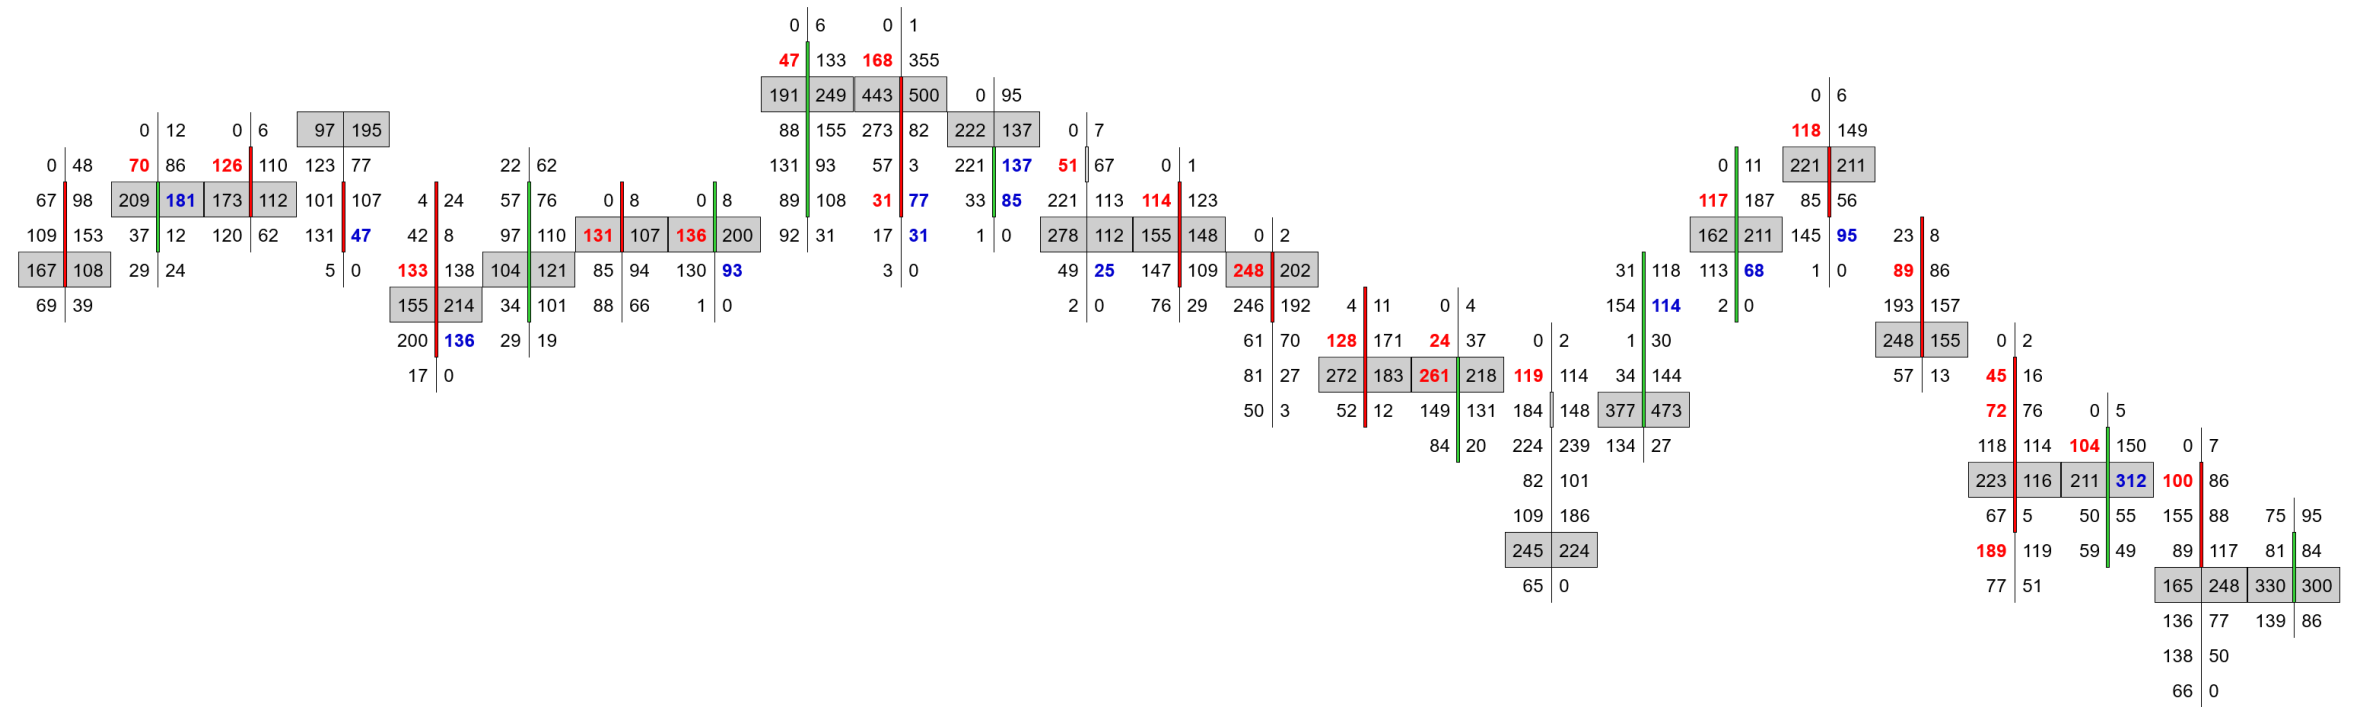

Order Flows Trader (ES 12-24 (1 Minute))

87. Momentum Strength + Stacked Imbalance + Zero Print

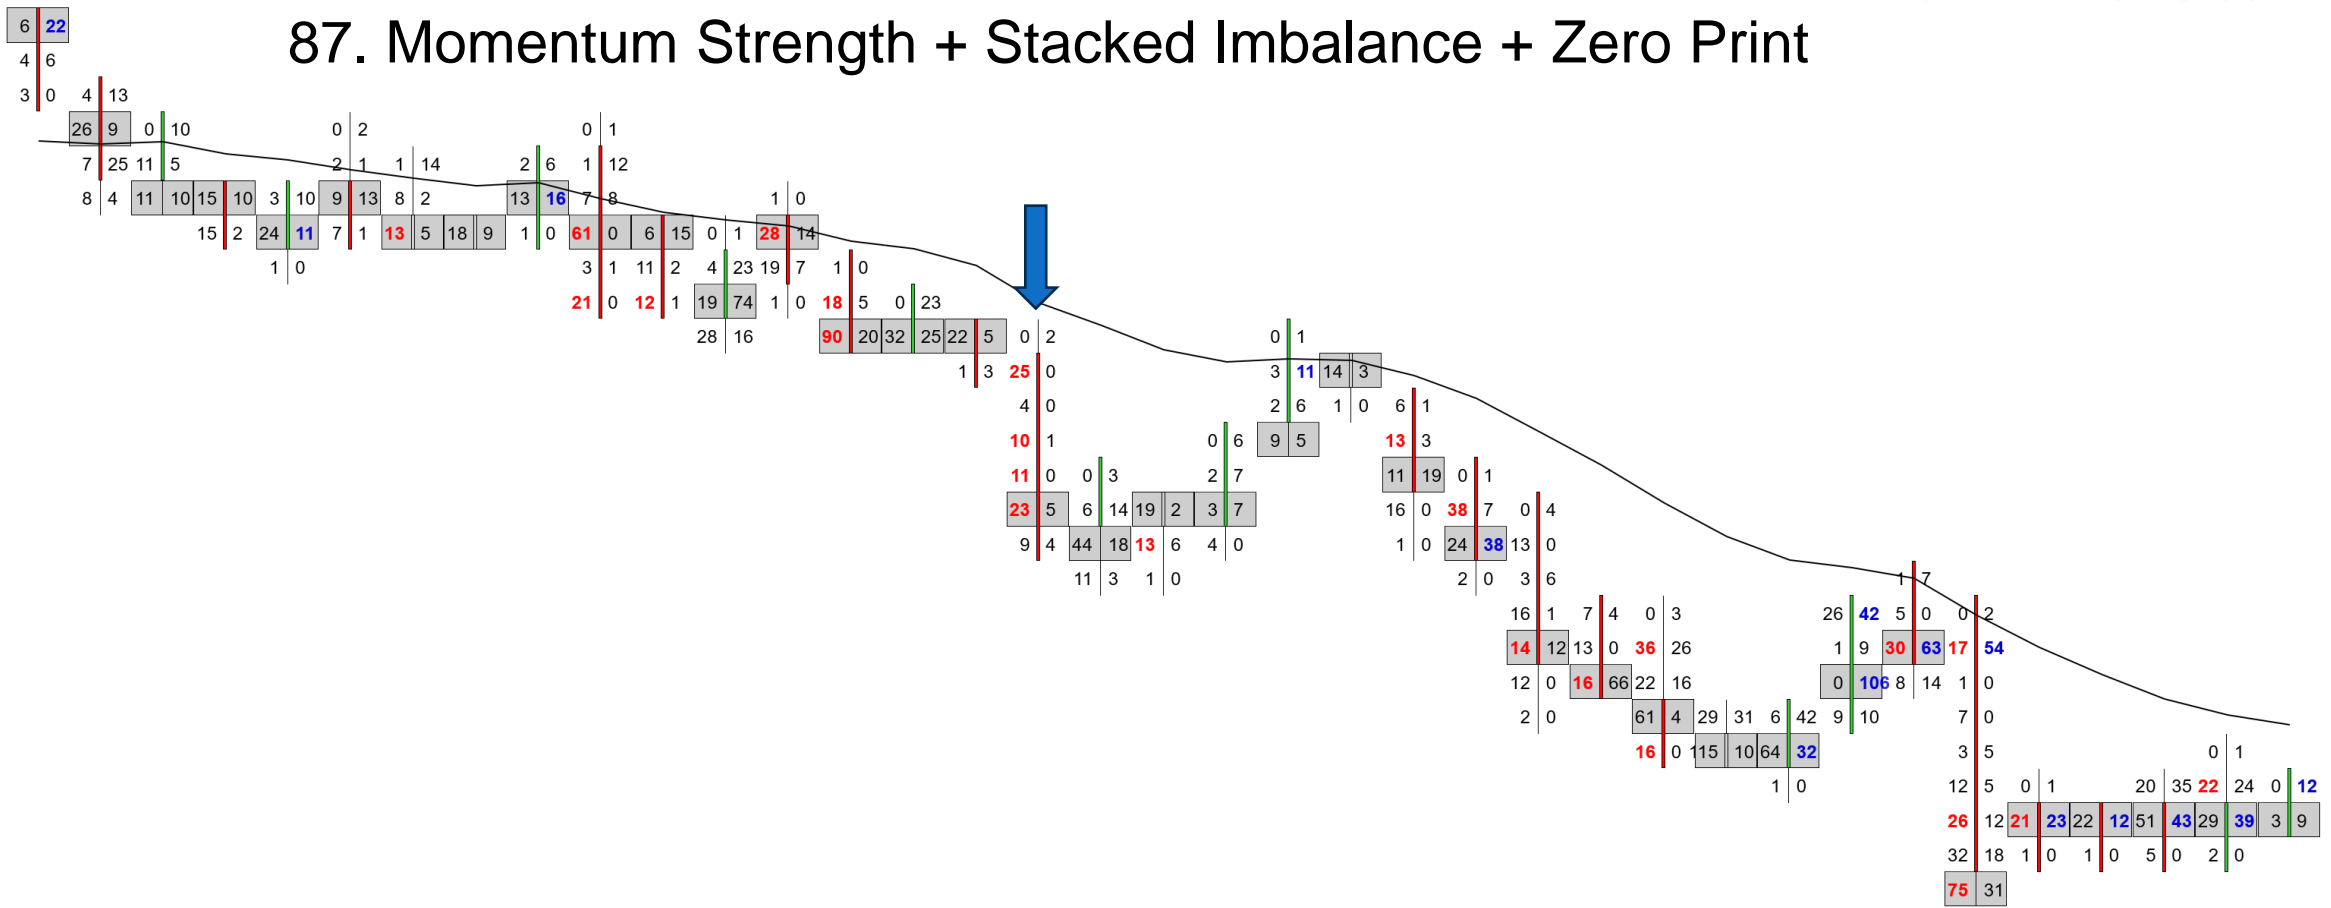

Fast moving chart sub 1-minute.

Explanation: Strong directional moves confirmed by multiple imbalances and lack of opposition.

- Aggressive directional price movement.
- Significant supply/demand imbalance and potential institutional activity.
- Complete absence of trading activity at specific price levels.

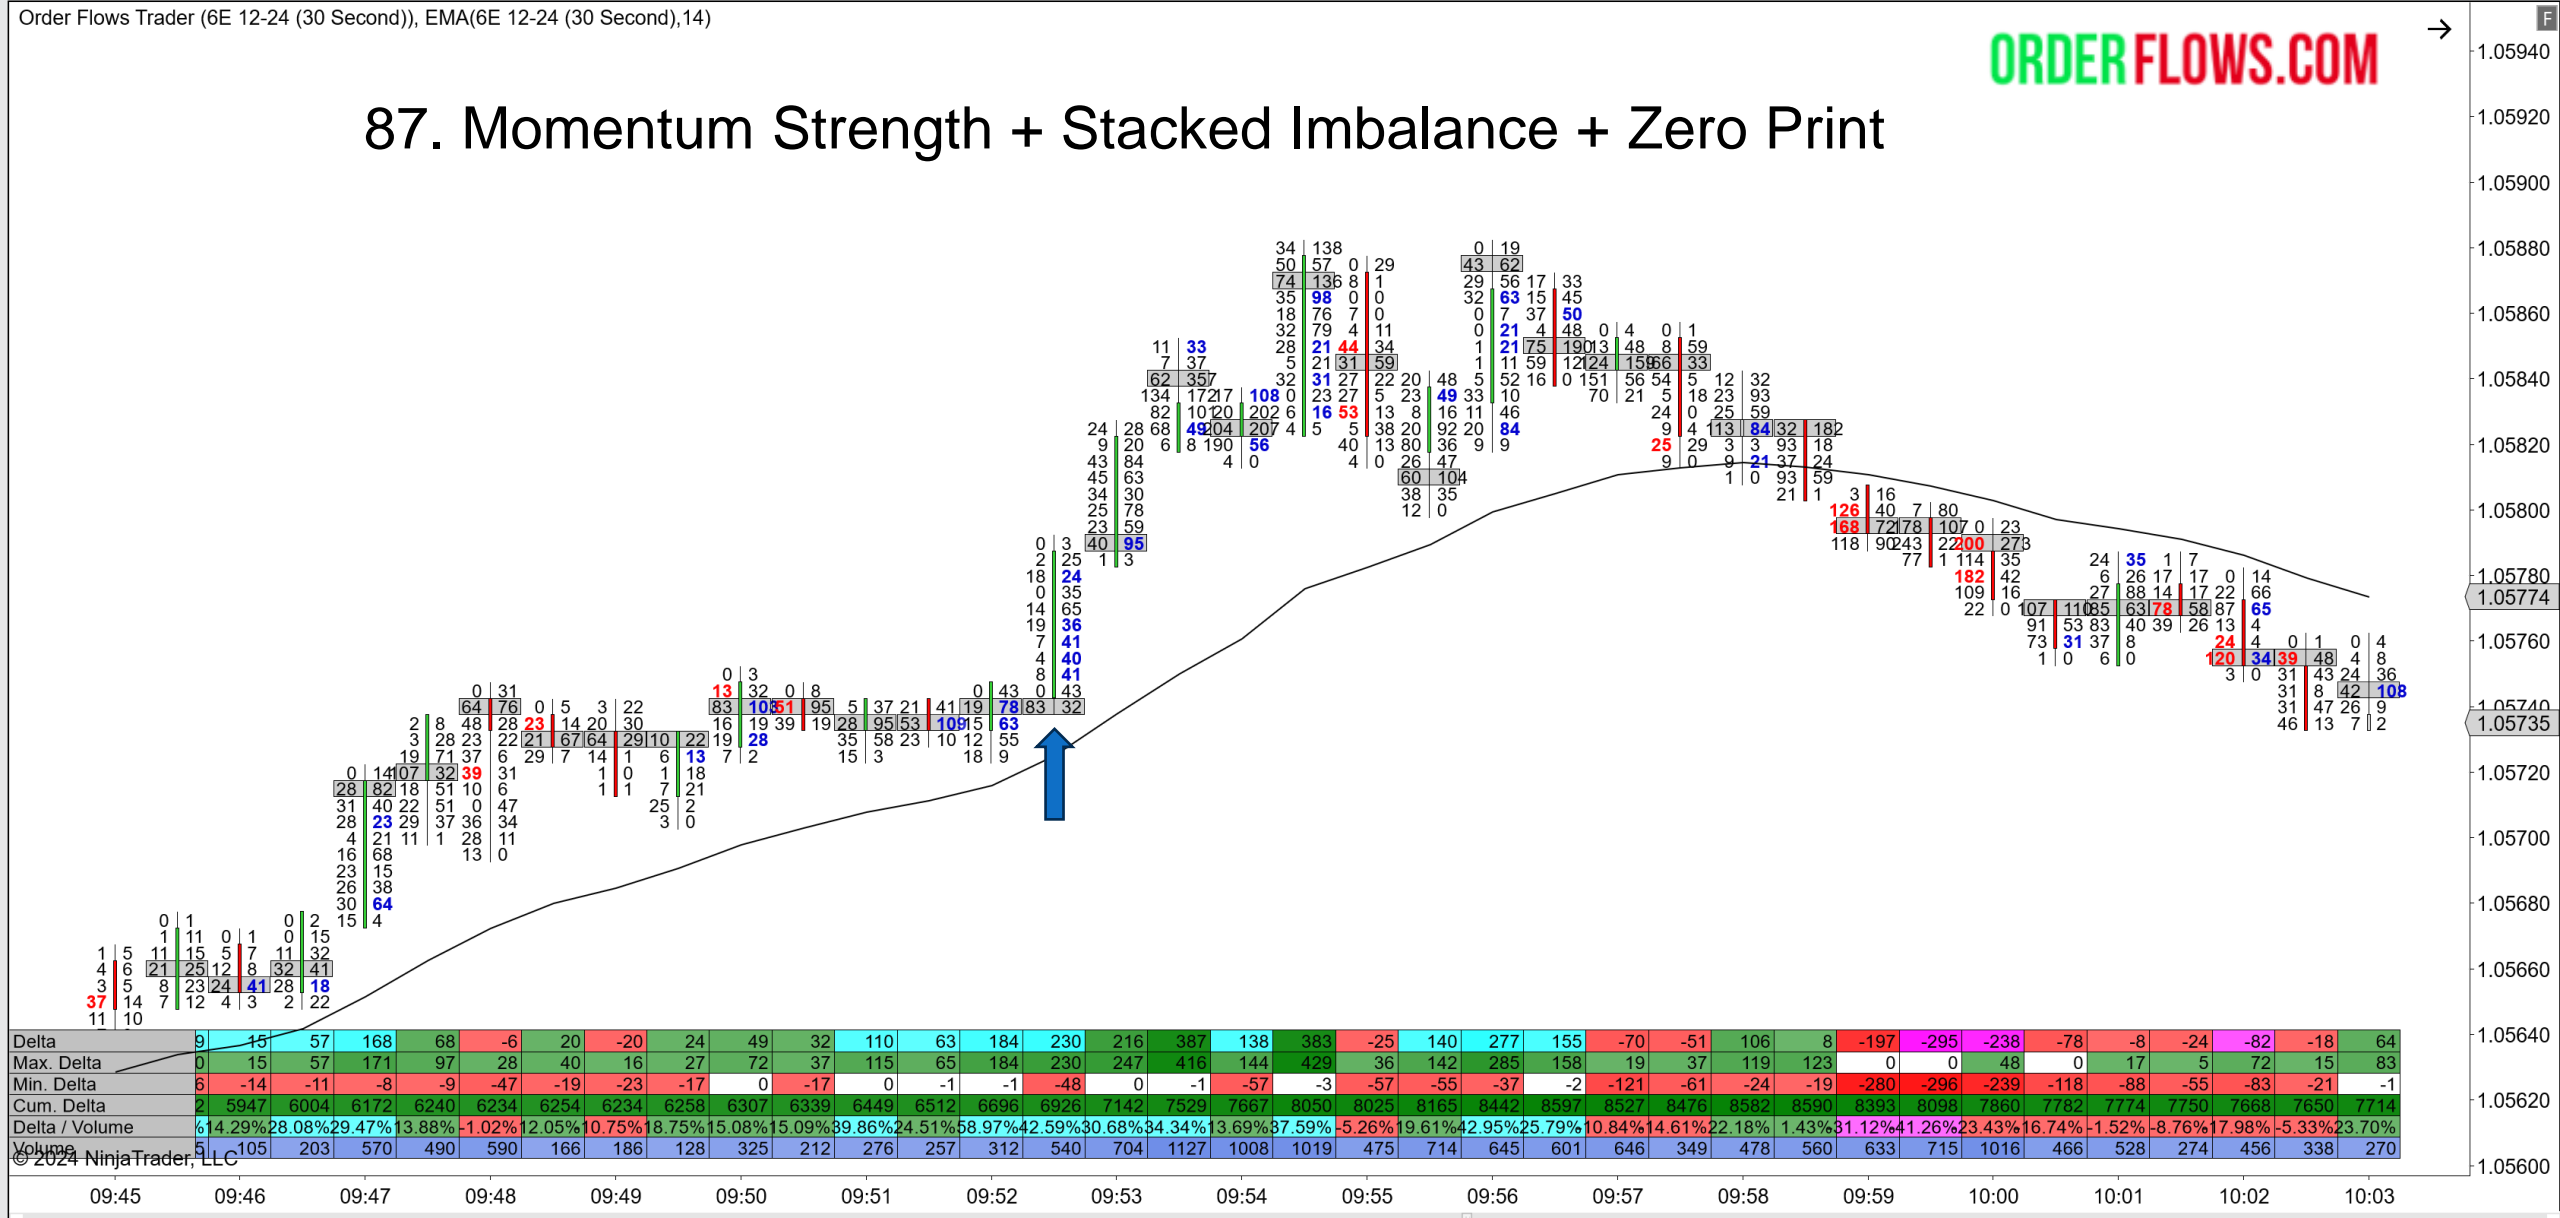

Triggers when there is minimal opposition to the prevailing momentum.

87. Momentum Strength + Stacked Imbalance + Zero Print

88. Momentum Strength + Abandoned Value Area + Volume Imbalance

Explanation: Strong moves away from rejected value areas with institutional confirmation.

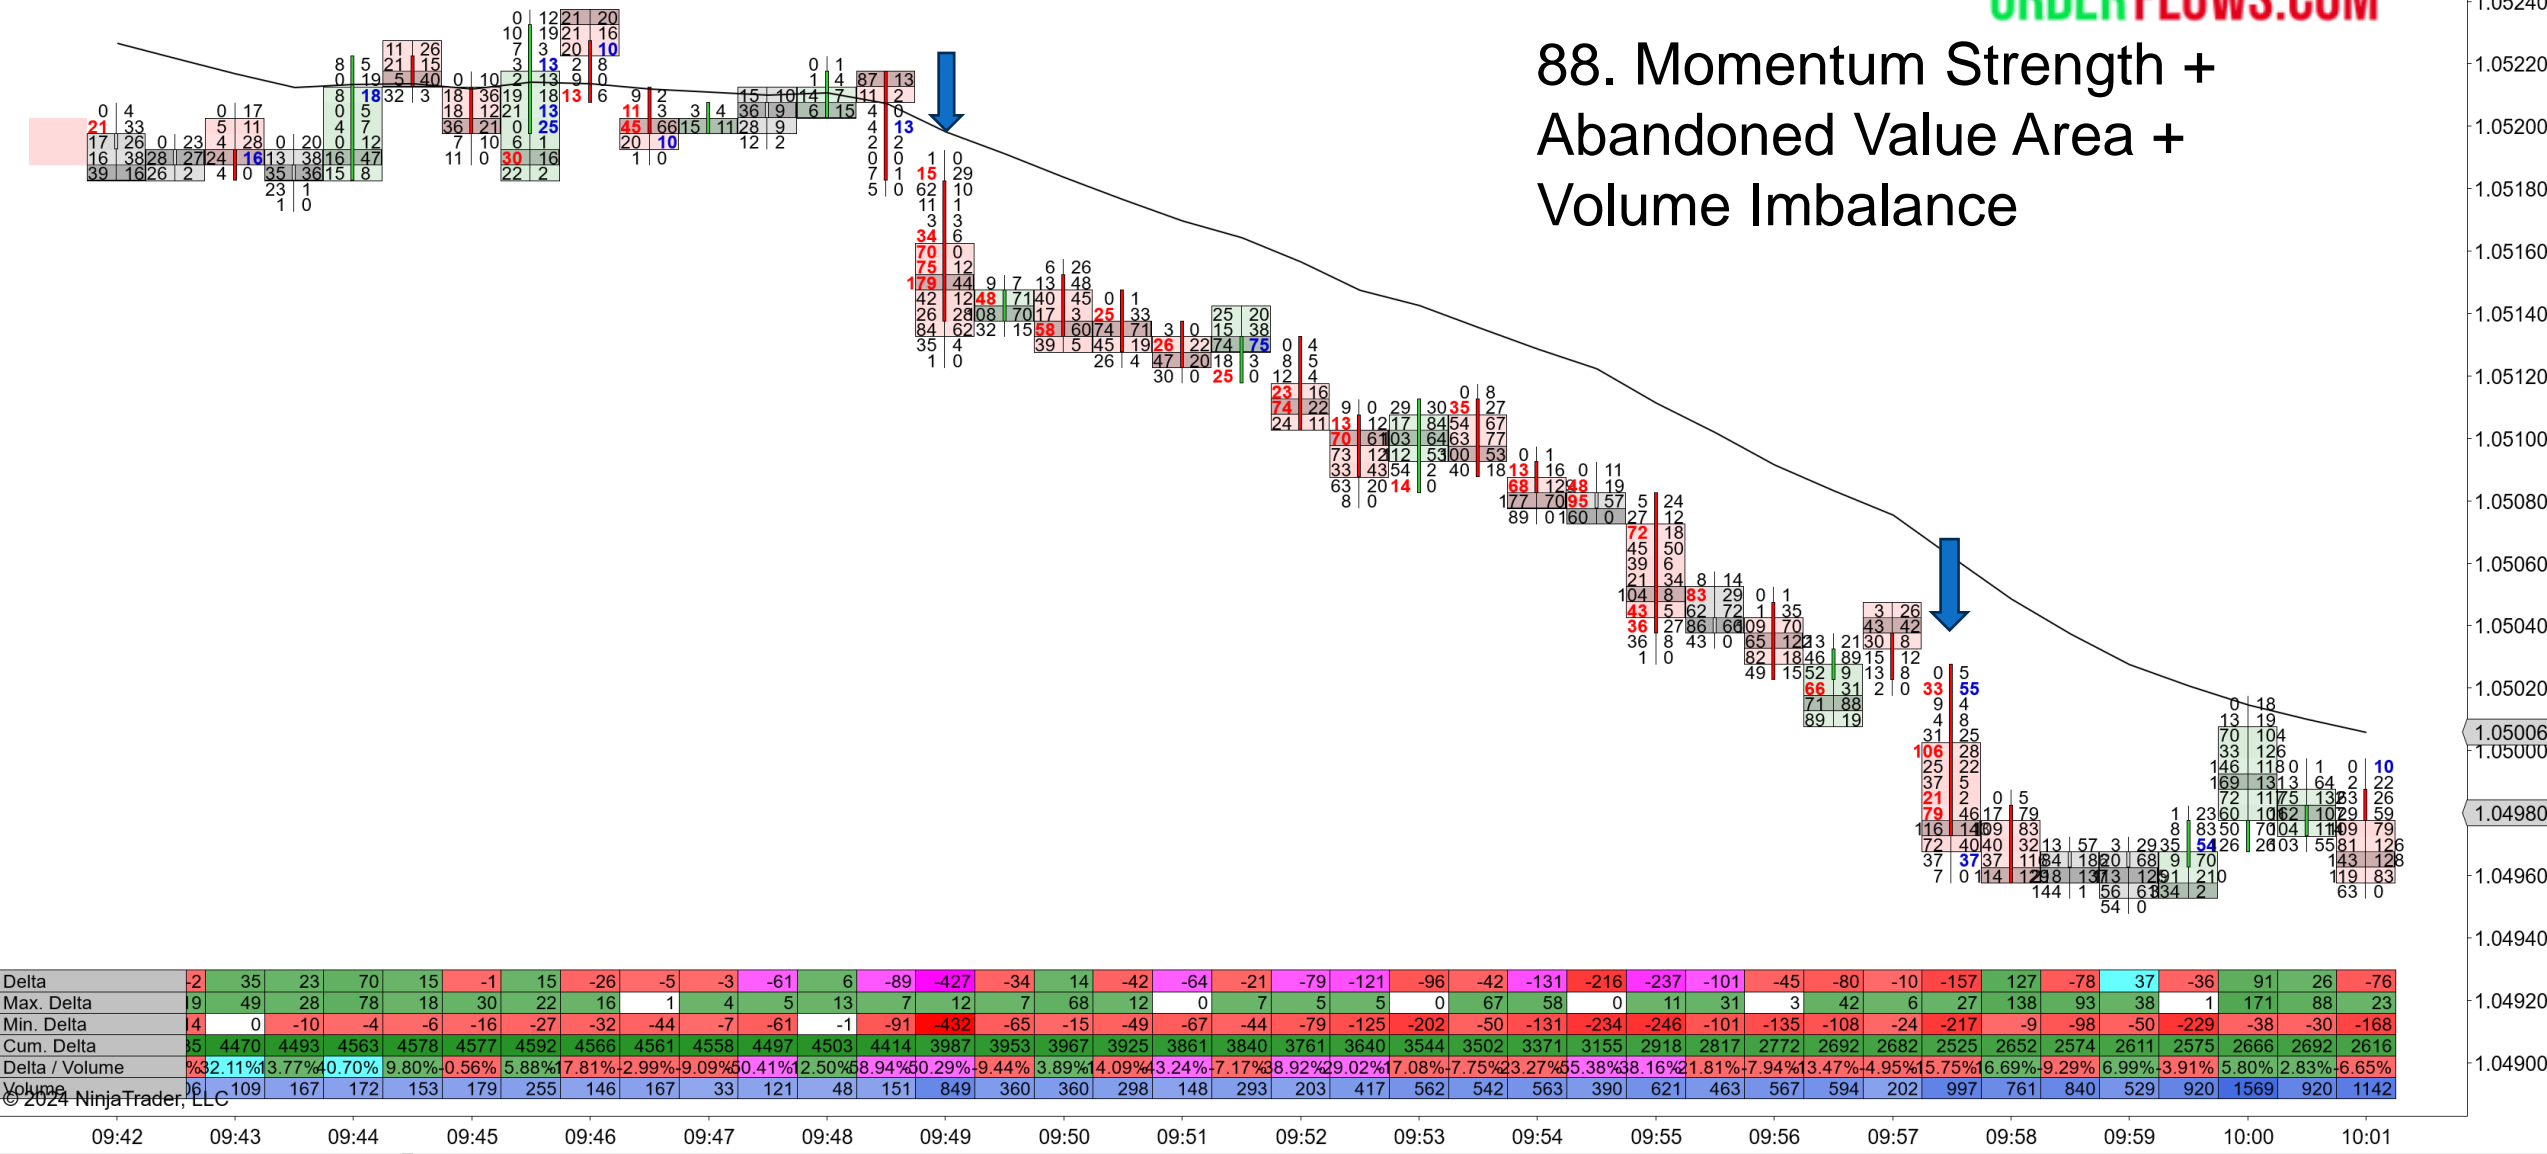

- Clear and aggressive price movement showing strong directional commitment.
- A previously active trading zone that suddenly loses interest and acceptance.
- Significant disparity in buying/selling volume and direction of the move away from value.

Triggers when price decisively rejects previously accepted trading zones, confirmed by significant volume imbalances.

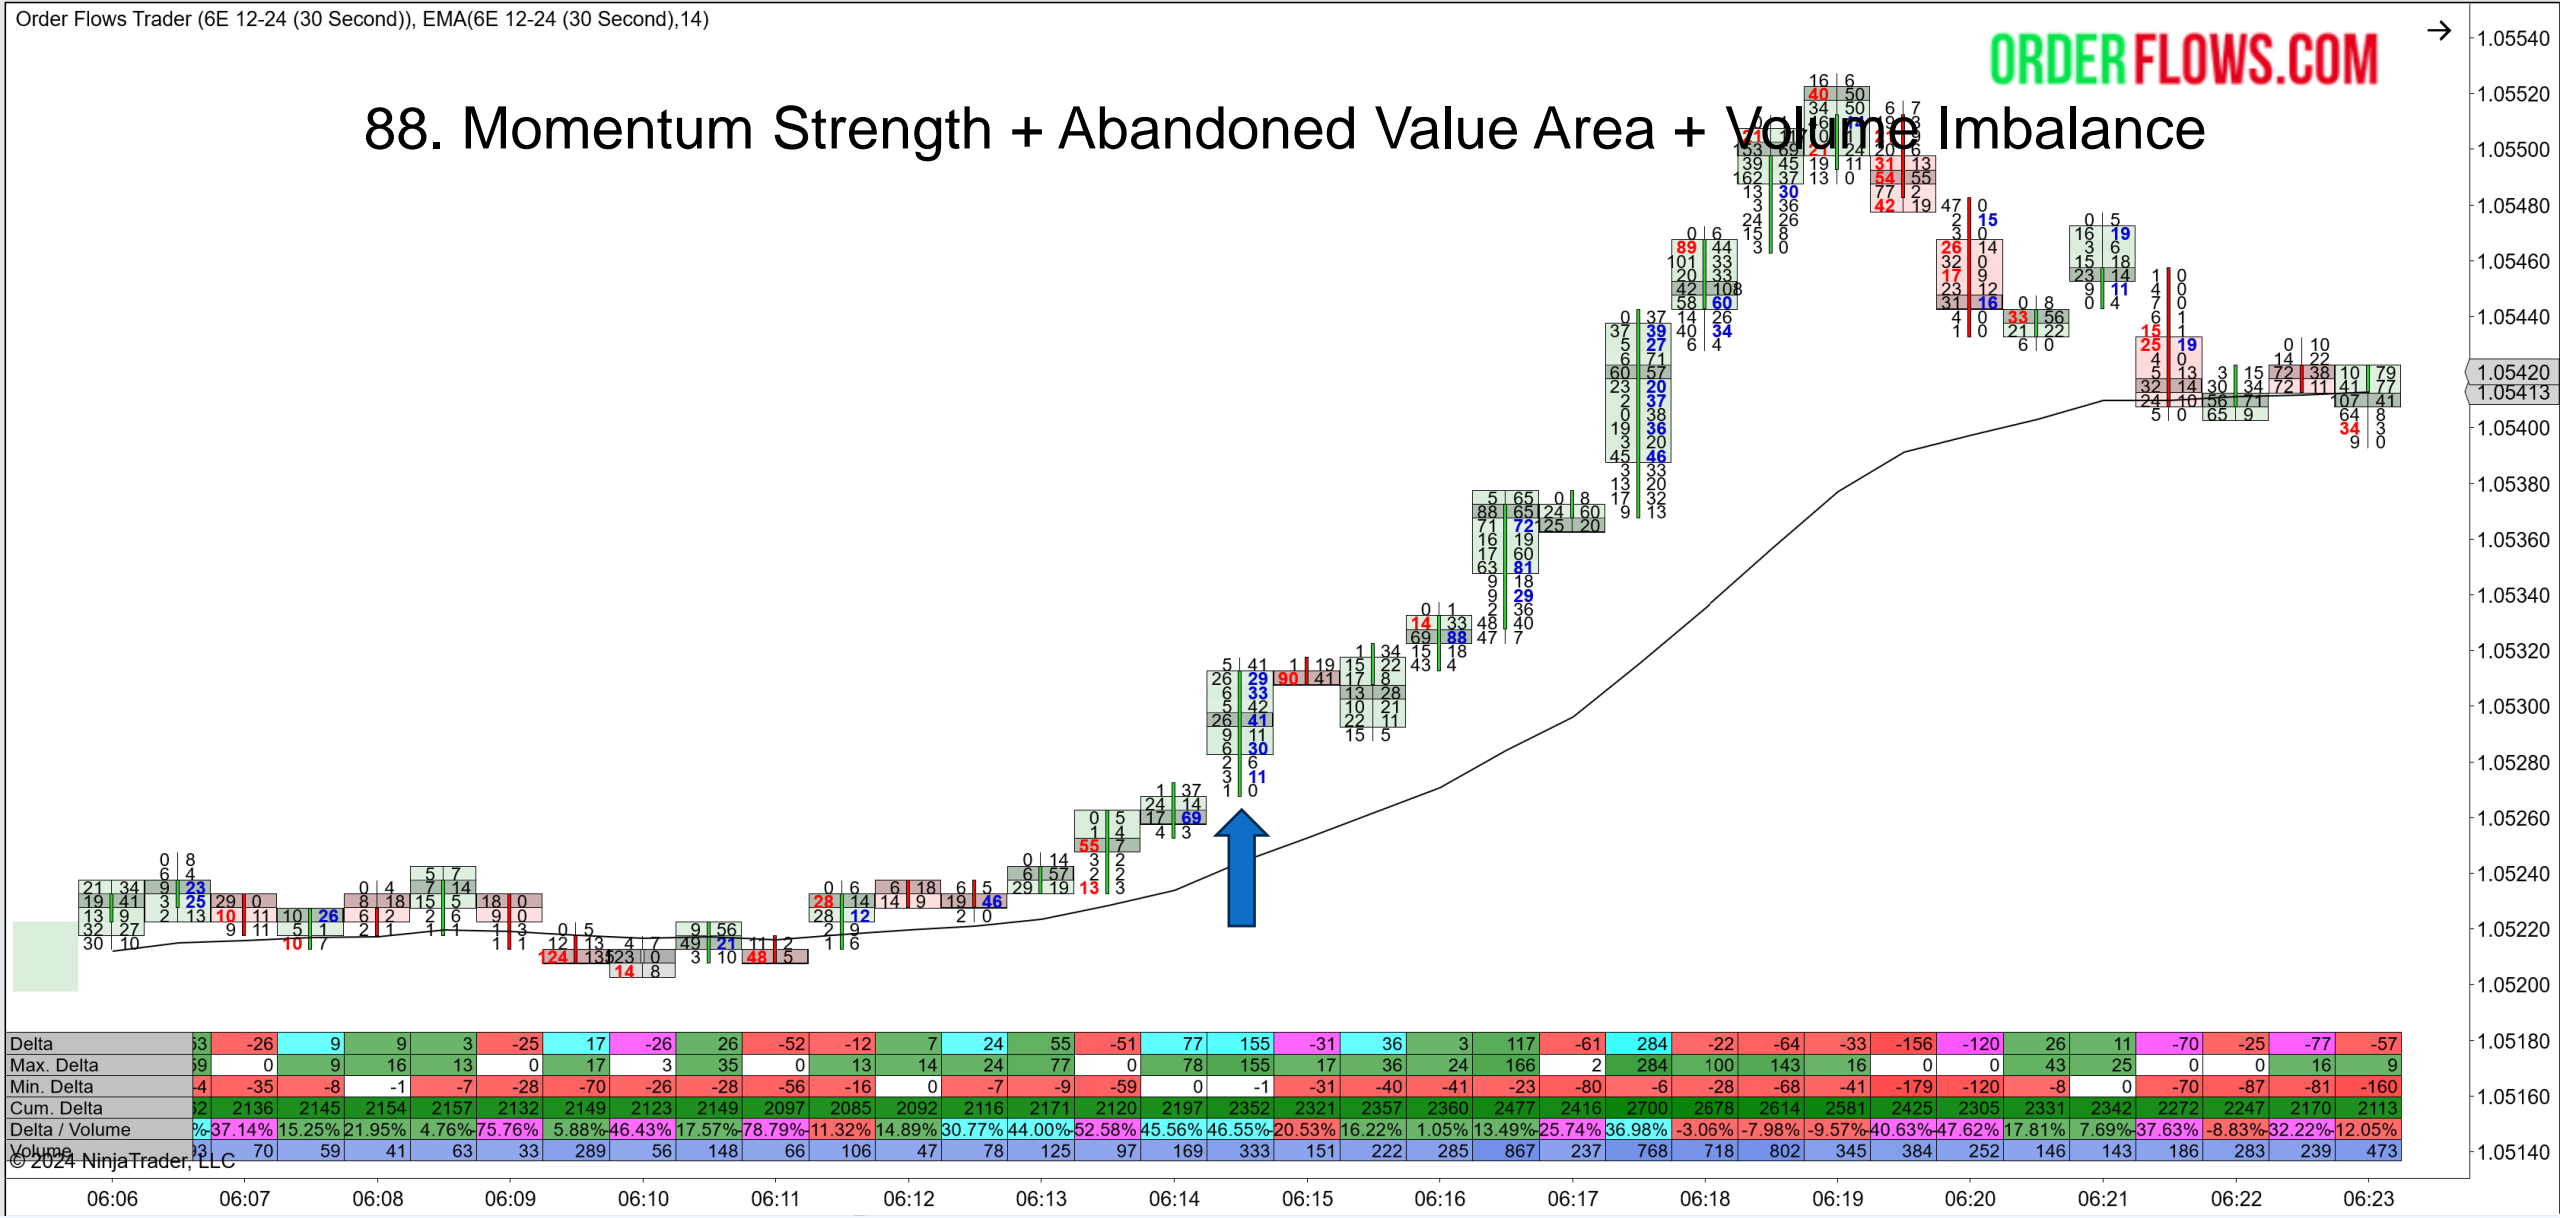

Order Flows Trader (6E 12-24 (30 Second)), EMA(6E 12-24 (30 Second),14)

ORDERFLOWS.COM

88. Momentum Strength + Abandoned Value Area + Volume Imbalance

88. Momentum Strength + Abandoned Value Area + Volume Imbalance

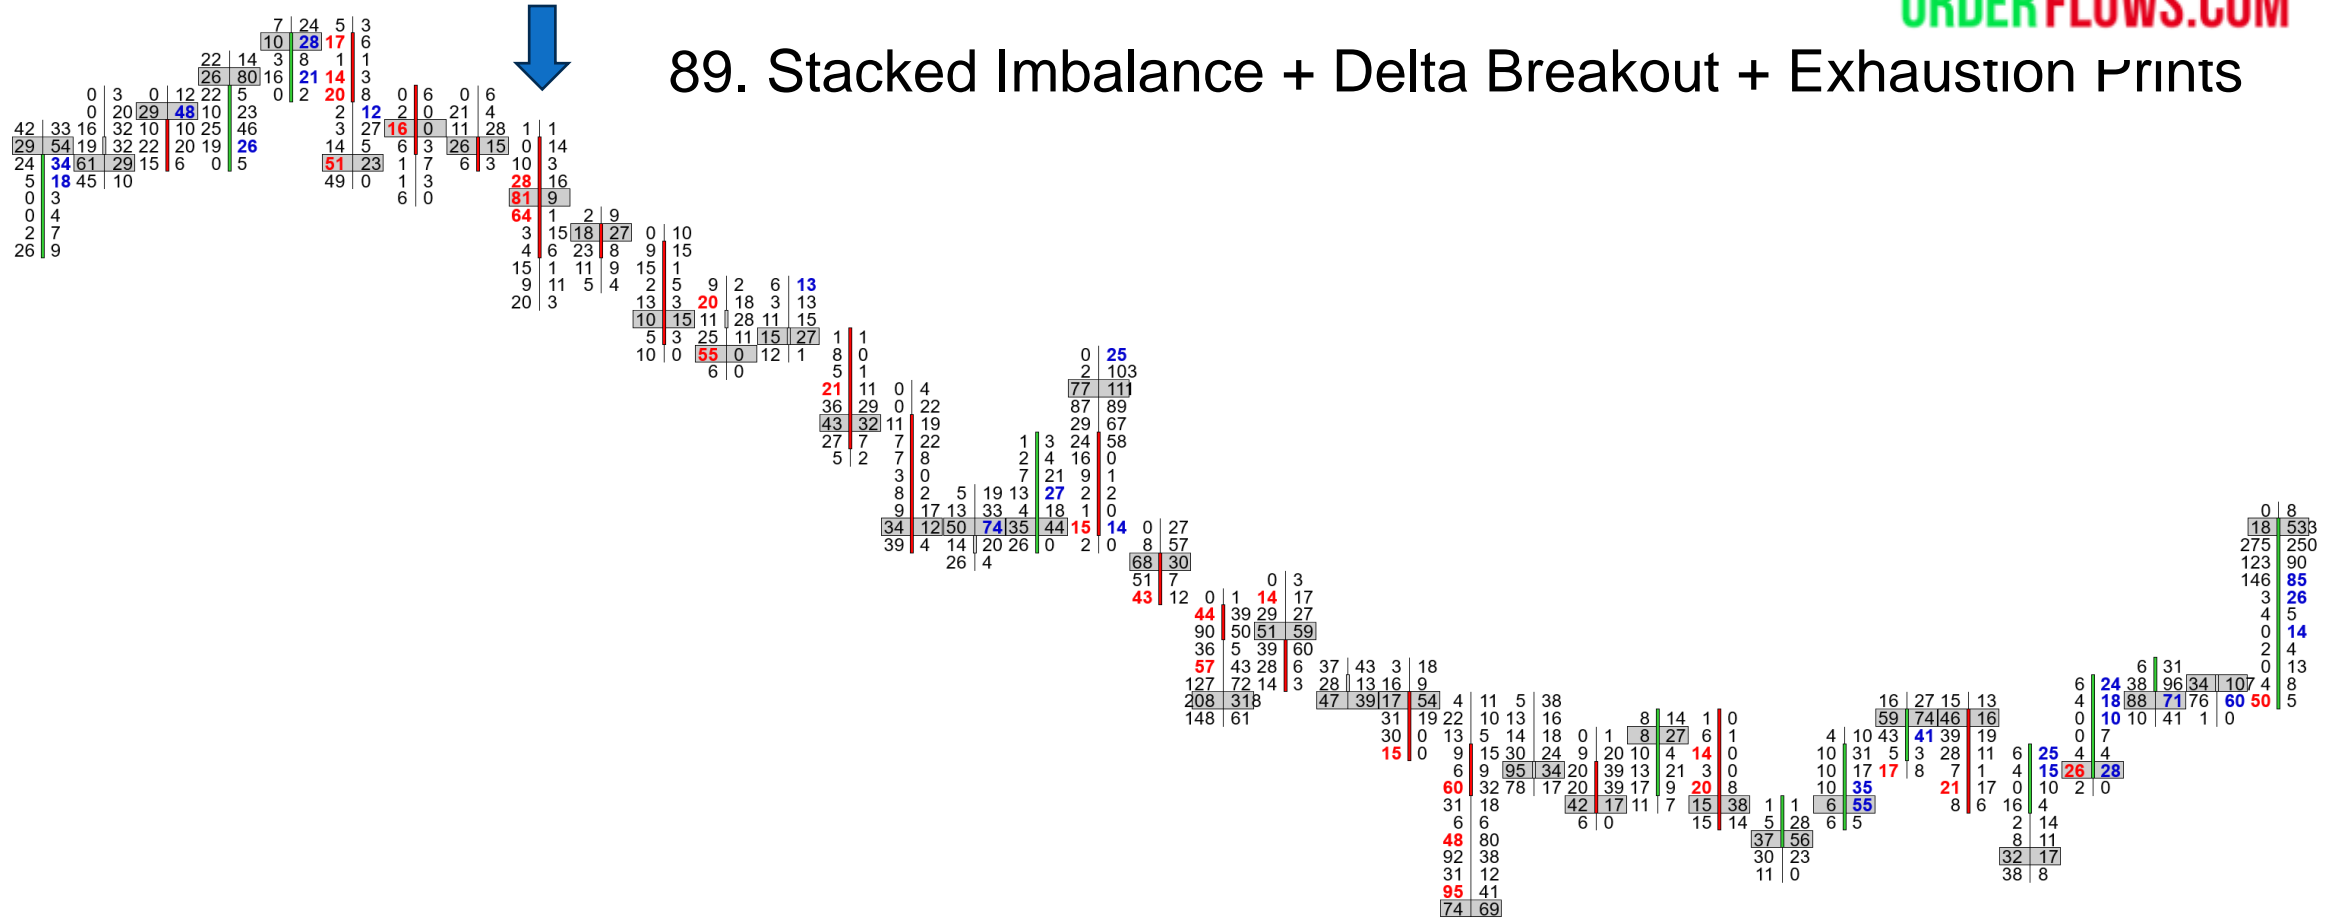

89. Stacked Imbalance + Delta Breakout + Exhaustion Prints

Explanation: Multiple pressure points leading to breakout and climactic action.

- Concentrated institutional interest and building pressure for a potential move.
- Significant shift in buying/selling pressure showing clear dominance of one side over the other, confirming directional bias.
- Low volume at extreme prices indicating lack of interest in opposing direction.

Triggers when multiple imbalances stack up and align with a strong delta shift.

89. Stacked Imbalance + Delta Breakout + Exhaustion Prints

90. Small Min/Max Delta + Extreme Delta Threshold + Volume Imbalance + Exhaustion Prints

Explanation: Captures hidden strength through the combination of positive delta, reinforced by multiple institutional imbalances and exhaustion signs.

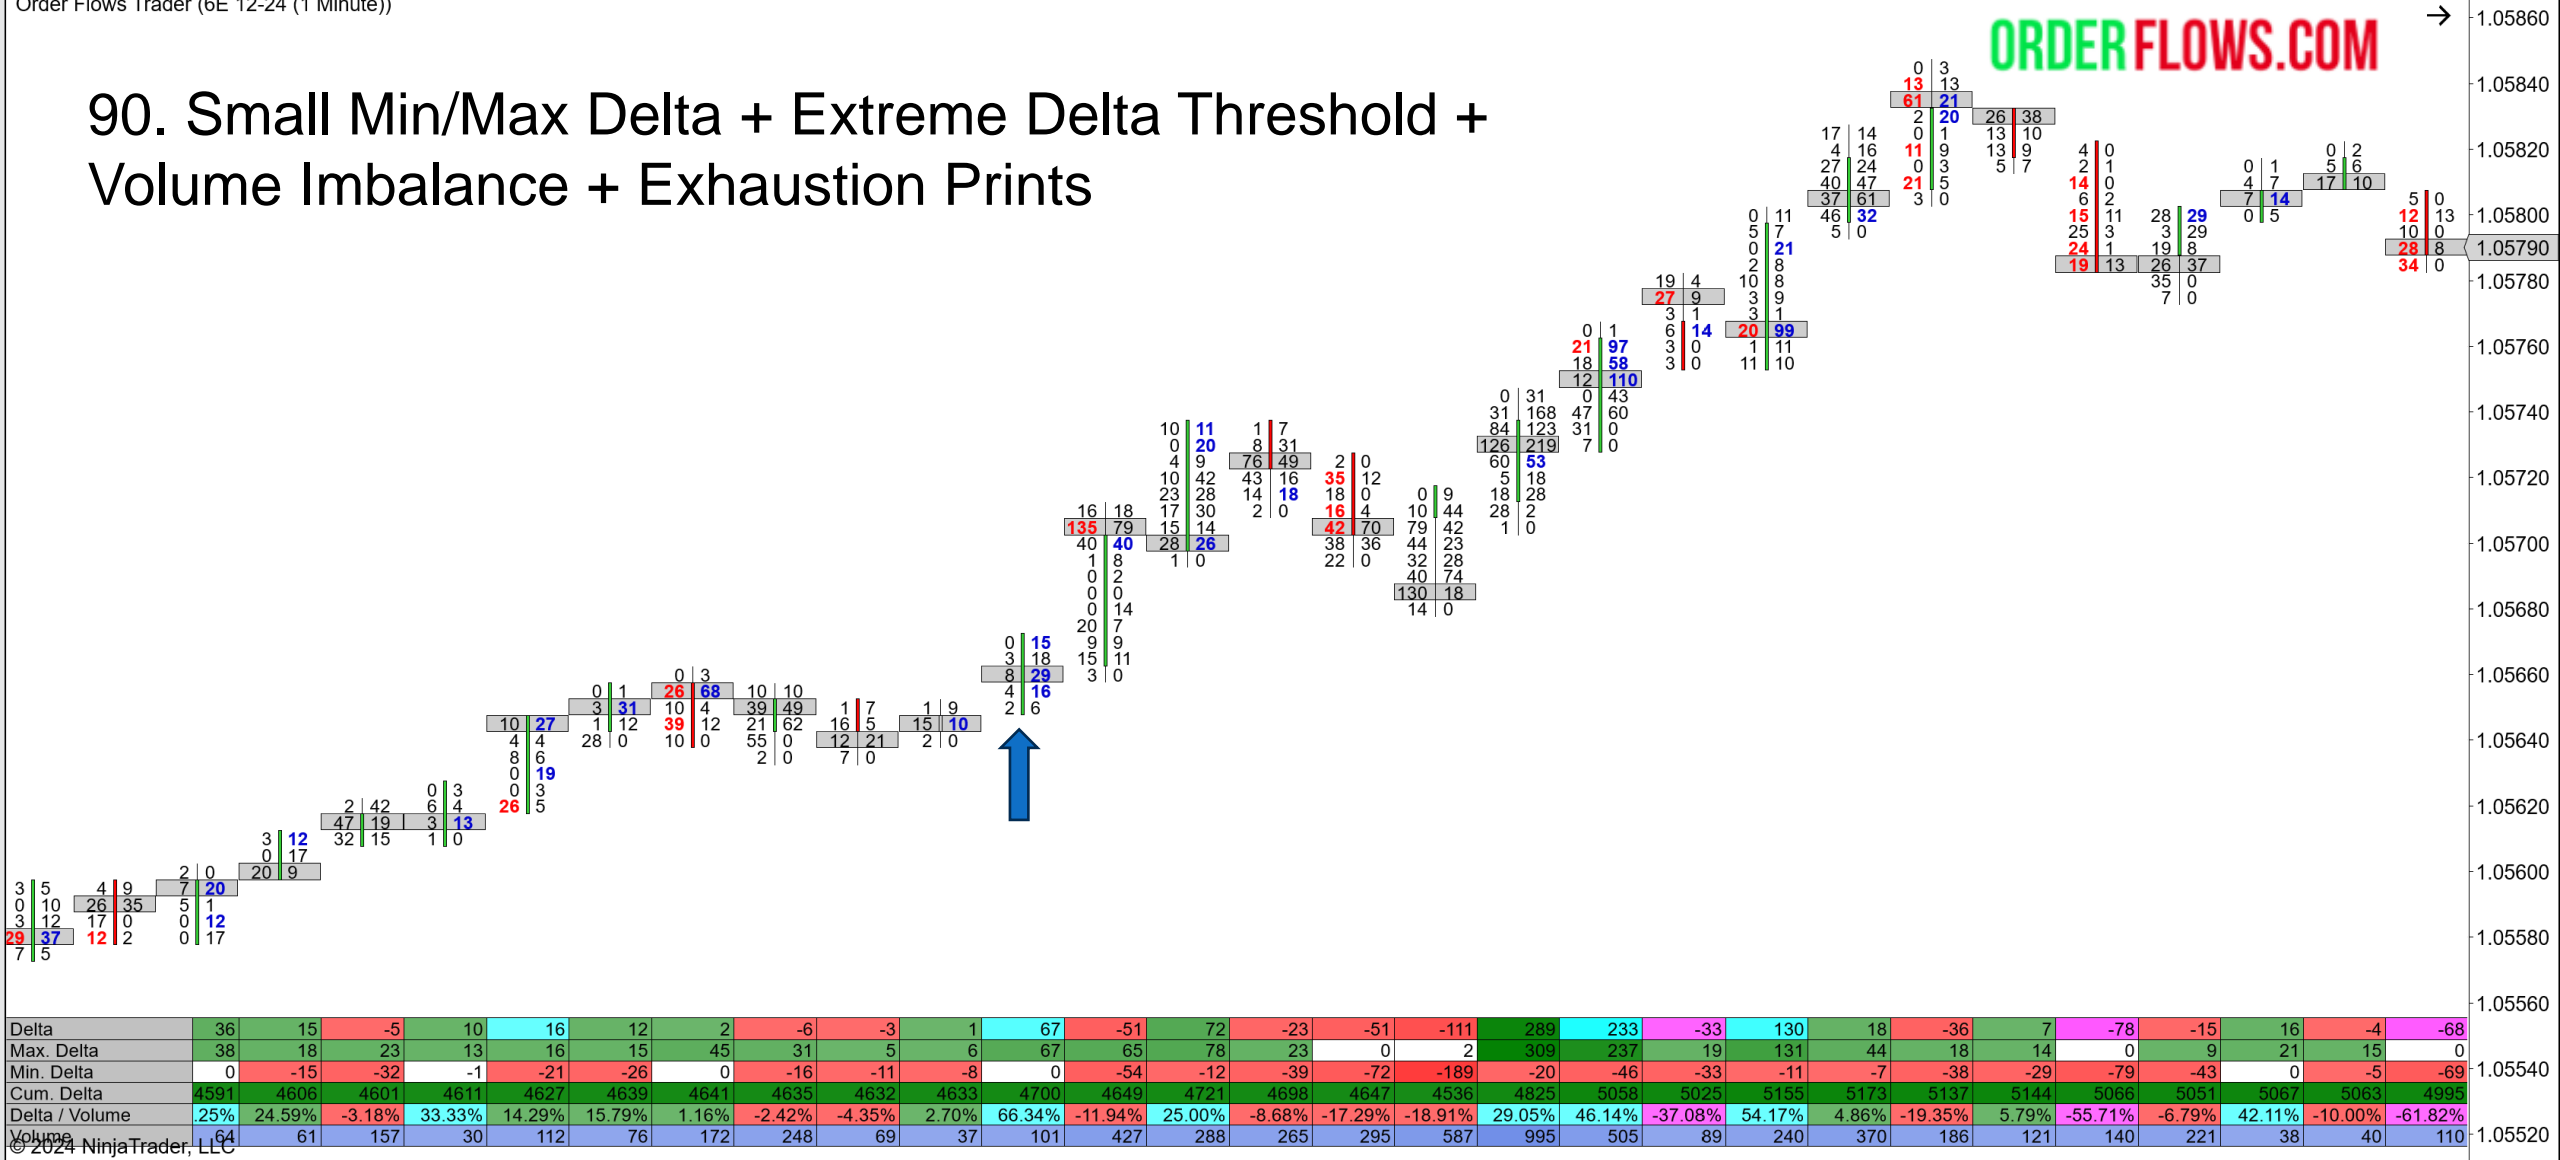

- Shows consistent excess of aggressive trading.
- Concentrated strong directional aggressive trading.
- Lack of volume at bar edges indicate lack of interest.

Triggers when there is sustained aggressive trading, confirmed with imbalances and lack of opposing trading.

91. Open POC + Stacked Imbalance + Exhaustion Prints

Explanation: Key level with multiple pressure points leading to a move.

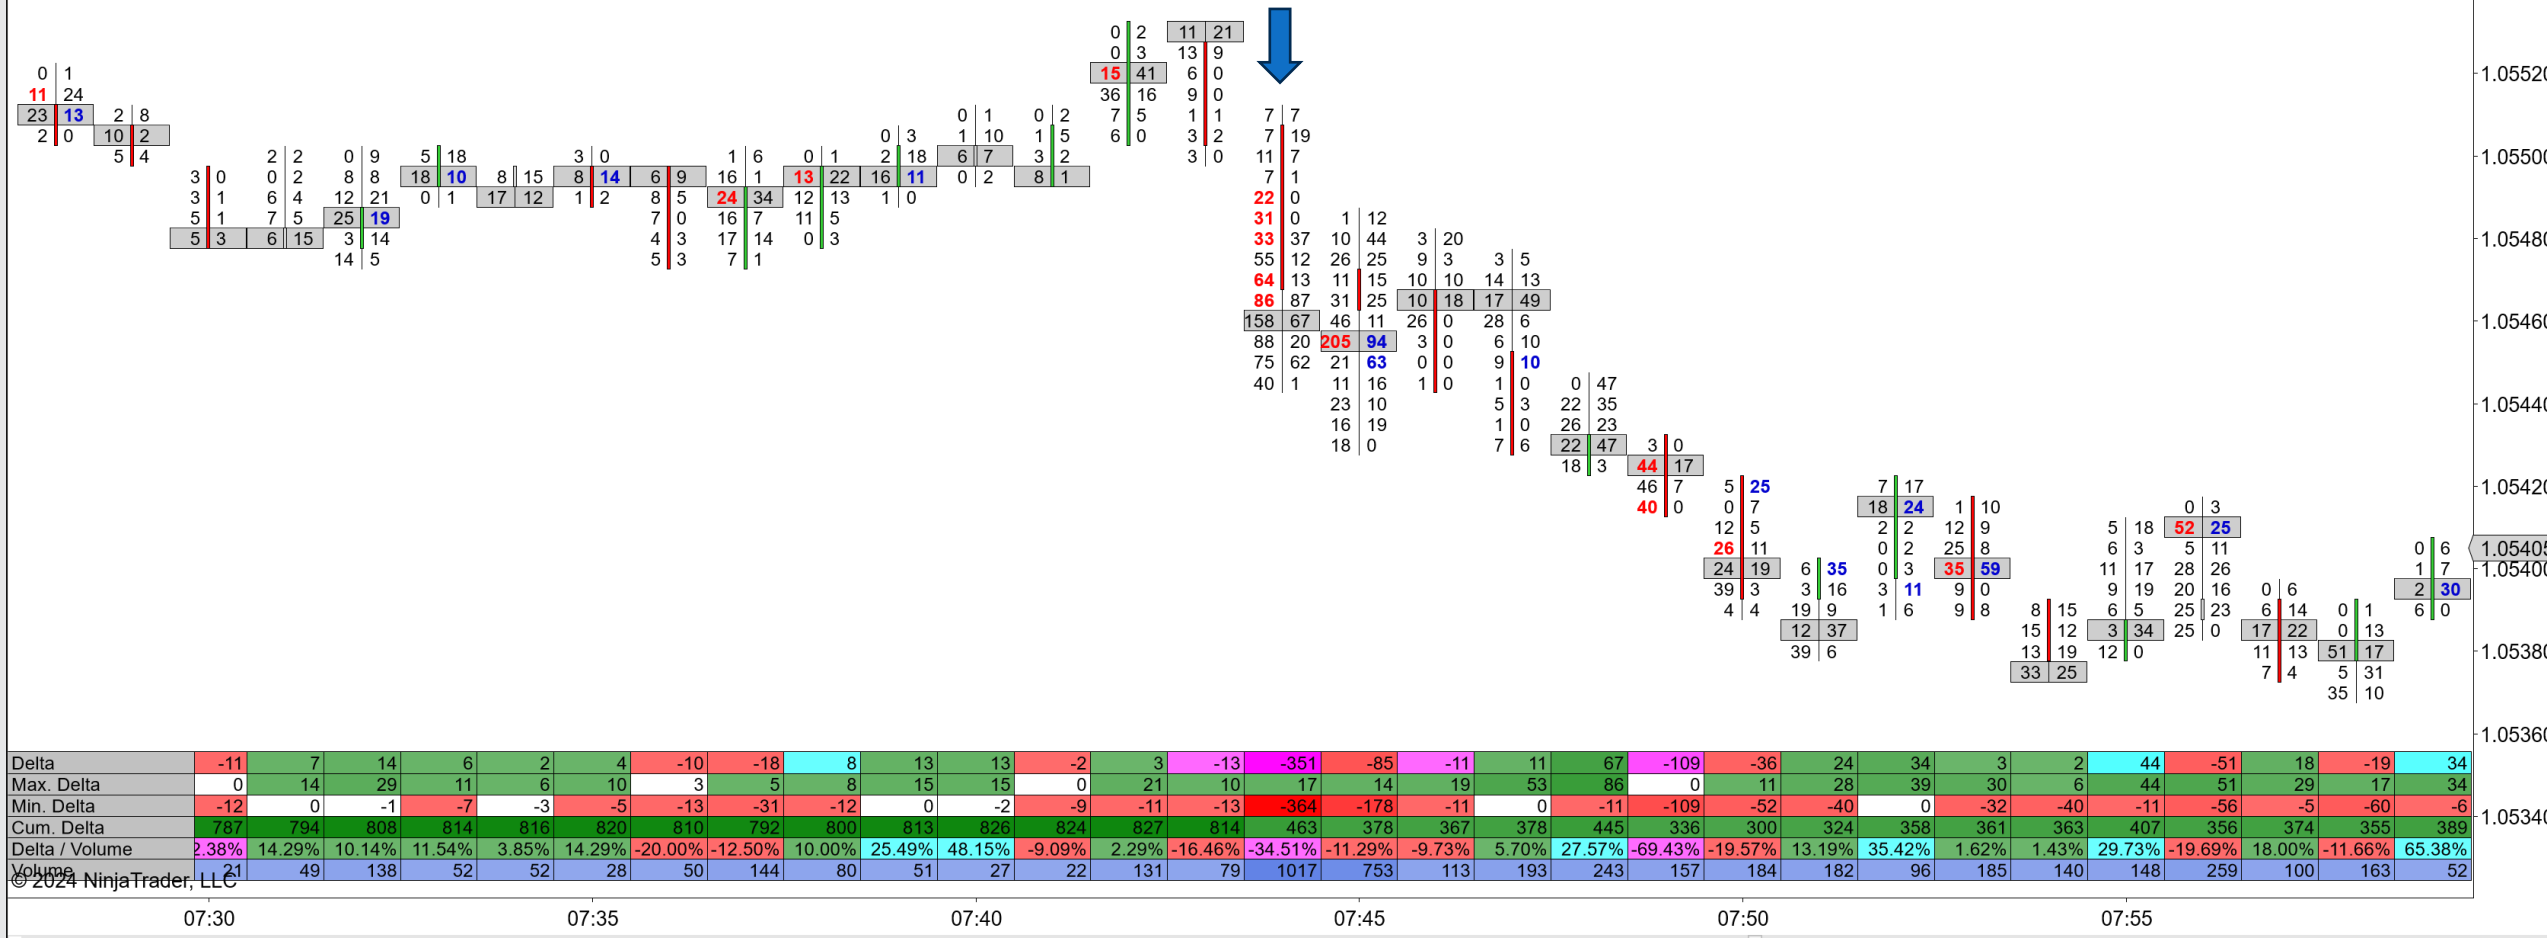

- Bar volume migrating directionally.
- Strong directional aggressive trading suggests shift in positioning.
- Reversal signs through lack of trading at edge of bar.

Triggers when market tests a level, fails and reverses.

End of Trade Setups: Part 4

This is the end of Orderflows Unlocked. By now you should be able to see the importance of using different aspects of order flow together to better understand what is happening in the market and more importantly to trade the market with that knowledge. So, when you see, for example, an exhaustion print what else should you look for that compliments it? The market is a puzzle and once you start putting the pieces together, everything just starts to make sense.
